Candidates are asked (i) to leave one line at the end of each paragraph, (ii) to indicate by blank spaces any omissions that are made, (iii) to note that high marks can be obtained only for answers in good English.

1. Translate into English:*Encounter in the rain.*

Nous étions un dimanche. Il était six heures du soir. La rue s'était changée en torrent. Mon violon sous le bras, j'attendais, devant la porte d'entrée, la fin de l'orage.

Quelqu'un vint se poster à mes côtés, mais je ne pris pas garde à lui. Comme moi, sans doute, il s'impatientait de toute cette obscurité et de toute cette pluie.

Peu à peu il cessait de pleuvoir. Je n'entendis enfin que le bruit, presque imperceptible, que faisaient les gouttes en tombant une à une du toit. Une voix! Qui donc me parlait?

Cela paraissait provenir de si loin, tout à fait comme dans un songe. Je me retournai brusquement et je reconnus le visage étrange que j'avais vu tout à l'heure. "Je voudrais parler de musique un peu"

O Level French Paper November 2009

Joseph Savirimuthu

O Level French Paper November 2009:

The French White Paper on Defence and National Security France. Commission du Livre blanc sur la défense et la sécurité nationale, 2008-07-15 The French White Paper on Defence and National Security sets forth a detailed roadmap for defending the nation's territory and security interests in a globalised world. It also describes how France can contribute to a wider and more effective role for Europe on the international scene. Upon being elected President of the French Republic, Nicolas Sarkozy appointed a wide-ranging Commission to appraise France's defence and security strategy. The resulting White Paper surveys today's uncertain world and addresses key questions in the field of international security. It embraces European developments, the transatlantic partnership, the evolution of the United Nations and the changing position of the Western world and its relations with the Asian and African powers. It tackles key changes in French defence and security policy in the coming years and the essential role of knowledge-based security and intelligence gathering, nuclear deterrence, the protection of citizens as well as of French and European territory and future operations abroad. The book considers questions that lie at the heart of modern military and political strategy. Issues dealt with include Jihadist inspired terrorism, proliferation of ballistic missiles, preparing for massive cyber attacks, the future shapes of warfare and the tools for building peace that globalisation affords. This White Paper will interest everyone concerned about international security and the role of citizens in contributing to their own security.

Data Driven e-Science Simon C. Lin, Eric Yen, 2011-02-04 ISGC 2010 The International Symposium on Grid Computing was held at Academia Sinica Taipei, Taiwan, March 2010. The 2010 symposium brought together prestigious scientists and engineers worldwide to exchange ideas, present challenges, solutions and to discuss new topics in the field of Grid Computing. Data Driven e-Science: Use Cases and Successful Applications of Distributed Computing Infrastructures, ISGC 2010, an edited volume, introduces the latest achievements in grid technology for Biomedicine, Life Sciences, Middleware, Security, Networking, Digital Library, Cloud Computing and more. This book provides Grid developers and end users with invaluable information for developing grid technology and applications. The last section of this book presents future development in the field of Grid Computing. This book is designed for a professional audience composed of grid users, developers and researchers working in the field of grid computing. Advanced level students focused on computer science and engineering will also find this book valuable as a reference or secondary text book.

Disaggregated Impacts of CAP Reforms: Proceedings of an OECD Workshop OECD, 2011-02-08 This report collects papers presented at the OECD Workshop on Disaggregated Impacts of CAP Reforms held in Paris in 2010, which focused on recent reforms. In particular, it examined the implementation of the single payment scheme since 2005 and the transfer of funds between different measures.

The Protection of Working Relationships Frans Pennings, Claire Bosse, 2011-01-01 In recent years, it has become clear that many businesses, motivated by avoiding the rigidity and the price tag associated with labour law and social security, have succeeded in eroding the protection of labour law by creating numerous categories of workers.

classified as non employees In 1996 the International Labour Organisation ILO adopted Recommendation 198 which asks its Members to undertake action to reduce disguised employment relationships with the goal of ensuring that those actually working in an employment relationship are actually given the corresponding legal status Though these are from a legal approach two conceptually different phenomena they are closely related from a social policy point of view In order to make a substantial contribution to the discussion on these developments a group of noted European labour law scholars has undertaken the research assembled in this book recommending labour law reforms based on a close examination of existing conditions The eight authors analyse measures and legal instruments offered by the European Union and the ILO to cover persons performing personal work as well as specific developments in Belgium France The Netherlands Poland Germany and the United Kingdom In each case they describe viable ways in which categories of persons not treated as employees can be brought under the protection of labour law and how the distinction between employees and self employed can become more clear In a concluding final Chapter comparative conclusions are drawn on the basis of this study and recommendations are given to the EU the ILO and the individual Member States Among the specific issues covered are the following redefining the subordination criterion the role of the courts determination of the contract of employment forms of labour involving more than two contracting parties e g employment agency arrangements the legal position of temporary workers employee like persons e g home workers or commercial representatives the bogus self employed introduction and effect of legal presumptions in labour law and or social security developing uniform criteria for the employment relationship criteria for identifying self employed but economically dependent workers extension of protection of labour law to persons other than employees or the self employed and social rights applicable to all work contracts irrespective of their formal qualification floor of core rights This study seriously contributes toward overcoming the reluctant and piecemeal measures commonly taken to extend the protection of the employment contract Although the authors acknowledge the continuing tension between labour law protection and the need for a flexible workforce they also recognize the positive effects of best practices that lead to more certainty fewer disputes and clear but still flexible if necessary agreements The book will be warmly welcomed as a signal contribution to addressing what one labour law scholar has called the most important industrial relations issue of our time

With, Without, or Against the State? Michaël Tatham, 2016-06-23 Much research has highlighted that sub state entities SSEs such as the German L nder the Spanish autonomous communities or the French regions mobilise at the European level This literature however is silent on how this sub state activity interacts with that of its own member state Do SSEs lobby in Brussels with their member state cooperation without their member state non interaction or against their member state conflict This book fills the current research gap by identifying what pattern of interaction between state and sub state EU interest representation corresponds to and by identifying what the determinants of such a pattern are To achieve this both quantitative and qualitative methods are employed The quantitative section

consists of regression analysis on data collected through a survey addressed to heads of regional offices in Brussels and highlights that cooperation is the most frequent outcome followed by non interaction Conflicting interest representation is the least frequent outcome Further analysis reveals that devolution levels do not affect conflict but increase the frequency of cooperation and decrease that of non interaction Meanwhile party political incongruence fails to affect conflict decreases cooperation and increases non interaction This quantitative work is complemented by a series of in depth case study analyses of Scotland UK Salzburg Austria Rh ne Alpes and Alsace both France Based on over a hundred semi structured interviews the case studies along with additional statistical testing confirm the overall findings reached through quantitative means and further suggest that the effect of devolution overrides that of party political incongruence Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and the VU Amsterdam and Walter Mattli of the University of Oxford

Global Warming Ishita Haldar, Global warming and climate change have become an issue of great concern Now as the world is getting technologically and industrially more advanced resulting in the setting up of huge factories the environmental pollution is heading towards alarming levels It is obvious that more factories mean more pollution and more carbon emissions which highly aggravate global warming Keeping this in view the policy makers from all over the world have decided to unite and chalk out a plan to keep the adverse effects of global warming within safety limits This book is also an effort in this direction Defining in detail the major aspects of global warming it discusses at length its causes and effects Taking a close look at the global response to contain global warming it also explains the important provisions of Copenhagen Summit Kyoto Protocol and Post Kyoto Protocol Negotiations on Green house Gas Emissions

Metaphors and Norms Stefan Larsson, 2011 *EU Energy Law and Policy* Kim Talus, 2013-09-05 A critical overview of European Union energy law and policy this book takes a law in context approach as it examines the development of EU energy law from the 1950s to the present day It discusses the development of EU

energy law the application of general EU law into energy the regulation of EU energy markets international aspects of EU energy law and policy sustainability and energy regulation Presenting an up to date overview of EU energy law and policy and a critical analysis of its sub areas the book extends the discussion from electricity and natural gas markets to other areas of energy including oil This holistic approach to the subject is then placed within the broader context of the international geopolitical sphere which EU energy law and policy operates as the author considers the impact of regional and international energy policies and markets on the EU markets and the overall EU policy He also draws on the wider context and takes into account non legal factors such as the impact of unconventional the rise of the BRICS and the Arab spring The book frames EU energy law as a topic that can provoke intellectual political and professional discussion about the slowly moving train of economic regulation under the typical pressures and contradictions of countries and the European Union in the global economy

The Role of the State and Accounting Transparency Mohammad Nurunnabi, 2016-03-17 Dr Mohammad Nurunnabi examines the factors that affect the implementation of International Financial Reporting Standards IFRS in developing countries and answers these specific research questions What is the relative impact of accounting regulatory frameworks and politico institutional factors on the implementation of IFRS in developing countries How do cultural factors affect said implementation How does a study of implementing IFRS help to build an understanding of a theory of the role of the state in accounting change in developing countries This follows a mixed methodology approach in which interviews are conducted IFRS related enforcement documents and annual reports are evaluated More than 138 countries have adopted IFRS yet the International Accounting Standards Board IASB does not provide an implementation index Financial reporting varies by country even within the area of the world that has apparently adopted IFRS and Nurunnabi offers an important viewpoint that considers the issues of IFRS implementation from various perspectives This is an invaluable resource for Undergraduate Masters and PhD students policy makers at local regional and international level namely the IASB World Bank IMF practitioners and users giving them the necessary insight into the financial reporting environment and the state s attitude towards accounting transparency Most importantly this book contributes to military and democratic political regimes and the Max Weberian view of the theory of the role of the state s attitude towards accounting transparency **India**

Patrick French, 2011-06-07 A monumental biography of the subcontinent from the award winning author of The World Is What It Is The Authorized Biography of V S Naipaul Second only to China in the magnitude of its economic miracle and second to none in its potential to shape the new century India is fast undergoing one of the most momentous transformations the world has ever seen In this dazzlingly panoramic book Patrick French chronicles that epic change telling human stories to explain a larger national narrative Melding on the ground reports with a deep knowledge of history French exposes the cultural foundations of India s political economic and social complexities He reveals how a nation identified with some of the most wretched poverty on earth has simultaneously developed an envied culture of entrepreneurship here are stories like

that of C K Ranganathan who trudged the streets of Cuddalore in the 1980s selling sample packets of shampoo and now employs more than one thousand people And even more remarkably French shows how despite the ancient and persistent traditions of caste as well as a mind boggling number of ethnicities and languages India has nevertheless managed to cohere evolving into the world s largest democracy largely fulfilling Jawaharlal Nehru s dream of a secular liberal order French s inquiry goes to the heart of all the puzzlements that modern India presents Is this country actually rich or poor Why has its Muslim population the second largest on earth resisted radicalization to such a considerable extent Why do so many children of Indians who have succeeded in the West want to return home despite never having lived in India Will India become a natural ally of the West a geostrategic counterweight to the illiberal rising powers China and Russia To find the answers French seeks out an astonishing range of characters from Maoist revolutionaries to Mafia dons from chained quarry laborers to self made billionaires And he delves into the personal lives of the political elite including the Italian born Sonia Gandhi one of the most powerful women in the world With a familiarity and insight few Westerners could approach Patrick French provides a vital corrective to the many outdated notions about a uniquely dynamic and consequential nation His India is a thrilling revelation

Urban Planning and Public Health in Africa Ambe J. Njoh, 2016-02-11 Established indicators of development suggest that as a group African countries lag behind their counterparts in other regions with respect to public health Particularly noteworthy is the fact that the public health problems of these countries are rooted in preventable causes associated with hygiene and sanitation It is customary to attribute the problems that ail Africa to the lack of financial resources This book deviates from convention by suggesting non financial factors as the source of sanitation problems on the continent and argues the need to re connect urban planning to public health These two professions are consanguine relatives and emerged to combat the negative externalities of the industrial revolution and concomitant urbanization However with the passage of time the professions drifted apart Today more than ever there is a need for the two to be re connected This need is rooted in the increasing complexity of urban problems whose resolution requires interdisciplinary initiatives To this end there is hardly any question that urban public health initiatives are unlikely to succeed without the collaboration of both public health and urban planning experts The book recognizes this truism and stands as the first major academic work to demonstrate the inextricably intertwined nature of urban planning and urban public health in Africa

Security and Privacy Joseph Savirimuthu, 2016-12-05 During the last decade in particular the levels of critical engagement with the challenges posed for privacy by the new technologies have been on the rise Many scholars have continued to explore the big themes in a manner which typifies the complex interplay between privacy identity security and surveillance This level of engagement is both welcome and timely particularly in a climate of growing public mistrust of State surveillance activities and business predisposition to monetize information relating to the online activities of users This volume is informed by the range of discussions currently conducted at scholarly and policy levels The essays illustrate the value of viewing privacy

concerns not only in terms of the means by which information is communicated but also in terms of the political processes that are inevitably engaged and the institutional regulatory and cultural contexts within which meanings regarding identity and security are constituted Routledge Handbook on the European Union and International Institutions Knud Erik

Jørgensen, Katie Verlin Laatikainen, 2013 This Handbook addresses the increasingly contested issue of profound political importance Europe's presence in multilateral institutions It assesses both the evolving role of Europe in international institutions and the transformations in international institutions themselves **Trust in International Police and Justice**

Cooperation Saskia Hufnagel, Carole McCartney, 2017-01-26 The use of extra territorial intelligence is growing among security border and public agencies Internationally rapidly evolving efforts to tackle transnational crime entail the exchange of intelligence across jurisdictions and state borders as well as the linking of law enforcement operations This book provides a number of different perspectives from across Europe Australasia and Canada to examine recent cooperation experiences and the challenges faced in practice The book brings together scholars from a range of legal and criminological fields to examine the legal imperatives and social parameters that shape international police and justice cooperation and highlights the importance of both trust and clear legal rules to ensure effective cooperation It focuses on areas where cooperation is now mandated but where significant issues are raised including the international and regional methods of information and intelligence exchange and challenges to human rights protection the coordination of international and regional exchange of evidence such as forensic bioinformation police cooperation in international investigations and the added value of formalising investigative strategies across jurisdictions regionally and internationally and the operation accountability and legitimacy of organisations and institutions of cooperation in law enforcement and specific international policing missions *News in the*

Internet Age New Trends in News Publishing OECD, 2010-10-18 This study provides an in depth treatment of the global newspaper publishing market and its evolution with a particular view on the development of online news and related challenges Global Identitarianism José Pedro Zúquete, Riccardo Marchi, 2023-06-02 Global Identitarianism is about the

global spread of the new far right ideology and social movement Identitarianism Founded in France in 2003 Identitarianism has inspired a range of groups such as Generation Identity in Europe and the alt right in America It has been spread by a far right constellation that includes white nationalist direct action groups think tanks alternative media organizations social media celebrities and political candidates This book explores the global reach of this contentious far right social movement using examples from Europe North America Australia and South America It will be essential reading for scholars and activists alike with an interest in race relations fascism extremism migration studies and social movements **Collective**

Bargaining Developments in Times of Crisis Sylvaine Laulom, 2016-04-24 In many EU Member States the various economic crises of recent years provided grounds for a rarely equalled level of state intervention in the regulation of labour relations with an explicit aim the decentralisation of collective bargaining An extensive body of research summed up and

analysed expertly in the chapters of this very important book reveals that the process of decentralisation has more often than not led to a situation where salaries and labour conditions are ever more frequently determined by direct negotiations between employer and employees with the State becoming the sole guarantor of employee protection even as it encourages decreasing labour costs to ensure that companies remain competitive The comparative approach offered in this book adds to this synthesis by providing examples of specific recent developments in fourteen Member States and Turkey Among the numerous topics and issues that arise are the following opt out clauses that derogate unfavourably from sectoral agreement standards extension of the employer's unilateral decision making power memoranda of understanding imposed by the troika EU ECB and IMF and stand by arrangements imposed by the IMF However notwithstanding the strong emphasis on changing the structure of collective agreements by shifting the centre of gravity closer to the company research finds promise in the reconstituted support for sector level agreements increasingly found among very small businesses networked businesses and work via digital platforms This is the first book to take stock of the current state of collective bargaining in Europe It is an essential study for labour and employment law practitioners and an exemplary analysis of immeasurable value to policymakers and academics in the field
