O Oundary En Ilber:

The Dynamics of Interstate Boundaries George Gavrilis, 2008-09-22 Grappling with an issue at the core of the modern state and international security George Gavrilis explores border control from the 19th century Ottoman Empire to 21st century Central Asia China and Afghanistan exploring why some borders deter insurgents smugglers bandits and militants while most suffer from infiltration and crisis *Modern Management based on Big Data III* Antonio J.

Tallón-Ballesteros, 2022-09-15 Data is the basic ingredient of all Big Data applications and Big Data technologies are constantly deploying new strategies to maximise efficiency and reduce the time taken to process information This book presents the proceedings of MMBD2022 the third edition of the conference series Modern Management based on Big Data MMBD The conference was originally scheduled to take place from 15 to 18 August 2022 in Seoul South Korea but was changed to a virtual event on the same dates Some 200 submissions were received for presentation at the conference 52 of which were ultimately accepted after exhaustive review by members of the programme committee and peer reviewers who took into account the breadth and depth of the research topics and the scope of MMBD Topics covered include data analytics modelling technologies and visualization architectures for parallel processing systems data mining tools and techniques machine learning algorithms and big data for engineering applications There are also papers covering modern management including topics such as strategy decision making manufacturing and logistics based systems engineering economy information systems and law based information treatment and papers from a special session covering big data in manufacturing retail healthcare accounting banking education global trading and e commerce Big data analysis and emerging applications were popular topics The book includes many innovative and original ideas as well as results of general significance all supported by clear and rigorous reasoning and compelling evidence and methods and will be of interest to all those working with Big Data **Records of the Parish of Batley in the County of York** Michael Sheard, 1894

Community-Based Collaborative Action Research Carol Pavlish, Margaret Pharris, 2012 Community Based Collaborative Action Research A Nursing Approach provides a clear framework for an action research process to improve health outcomes and enact needed systems improvement The authors bring years of experience in community based collaborative action research CBCAR to demonstrate how nursing and other health care practitioners leaders and scholars can transform communities by identifying and addressing systemic and structural barriers to health and well being These communities can range from neighborhoods practice environments and villages to boardrooms and organizations Ideal for novice and experienced researchers including graduate and doctoral students involved in research initiatives and capstone projects this rigorous text is a non prescriptive step by step guide to enacting meaningful change that emerges primarily from within the community Rooted in social justice and advocacy and driven by theory and evidence based practice Community Based Collaborative Action Research A Nursing Approach is a unique and innovative resource **Surge**

Tectonics: A New Hypothesis of Global Geodynamics Arthur A. Meyerhoff, I. Taner, A.E.L. Morris, W.B. Agocs, M. Kamen-Kaye, Mohammad I. Bhat, N. Christian Smoot, Dong R. Choi, 1996-08-31 TECTONICS AND PHYSICS Geology although rooted in the laws of physics rarely has been taught in a manner designed to stress the relations between the laws and theorems of physics and the postulates of geology The same is true of geophysics whose specialties seismology gravimetry magnetism magnetotellurics deal only with the laws that govern them and not with those that govern geology's postulates The branch of geology and geophysics called tectonophysics is not a formalized discipline or subdiscipline and therefore has no formal laws or theorems of its own Although many recent books claim to be textbooks in tectonophysics they are not they are books designed to explain one hypothesis just as the present book is designed to explain one hypothesis The textbook that comes closest to being a textbook of tectonophysics is Peter 1 Wyllie's 1971 book *The Dynamic Earth* Teachers students and practitioners of geology since the very beginning of earth science teaching have avoided the development of a rigorous but not rigid scientific approach to tectonics largely because we earth scientists have not fully understood the origin of the features with which we are dealing This fact is not at all surprising when one considers that the database for hypotheses and theories of tectonics particularly before 1960 has been limited to a small part of the exposed land area on the Earth's surface

The Ottoman East in the Nineteenth Century Ali Sipahi, Dzovinar Derderian, Yasar Tolga Cora, 2016-06-10 The Ottoman East what is also called Western Armenia Northern Kurdistan or Eastern Anatolia compared to other peripheries of the Ottoman Empire has received very little attention in Ottoman historiography So called taboo subjects such as the fate of Ottoman Armenians and the Kurdish Question during the latter years of the Ottoman Empire have contributed to this dearth of analysis By integrating the Armenian and Kurdish elements into the study of the Ottoman Empire this book seeks to emphasise the interaction of different ethno religious groups As an area where Ottoman centralization faced unsurpassable challenges the Ottoman East offers an ideal opportunity to examine an alternative social and political model for imperial governance and the means by which provincial rule interacted with the Ottoman centre Discussing vital issues across this geographical area such as trade routes regional economic trends migration patterns and the molding of local and national identities this book offers a unique and fresh approach to the history and politics of modernization and empire in the wider region

Forest and Stream, 1900 *Analytic Functions of Several Complex Variables* Robert C. Gunning, Hugo Rossi, 2022-08-25 The theory of analytic functions of several complex variables enjoyed a period of remarkable development in the middle part of the twentieth century After initial successes by Poincaré and others in the late 19th and early 20th centuries the theory encountered obstacles that prevented it from growing quickly into an

analogue of the theory for functions of one complex variable Beginning in the 1930s initially through the work of Oka then H Cartan and continuing with the work of Grauert Remmert and others new tools were introduced into the theory of several complex variables that resolved many of the open problems and fundamentally changed the landscape of the subject These tools included a central role for sheaf theory and increased uses of topology and algebra The book by Gunning and Rossi was the first of the modern era of the theory of several complex variables which is distinguished by the use of these methods The intention of Gunning and Rossi s book is to provide an extensive introduction to the Oka Cartan theory and some of its applications and to the general theory of analytic spaces Fundamental concepts and techniques are discussed as early as possible The first chapter covers material suitable for a one semester graduate course presenting many of the central problems and techniques often in special cases The later chapters give more detailed expositions of sheaf theory for analytic functions and the theory of complex analytic spaces Since its original publication this book has become a classic resource for the modern approach to functions of several complex variables and the theory of analytic spaces Further information about this book including updates can be found at the following URL www.ams.org/publications/authors/books/postpub/chel368
