Achievement increased across all science subjects and maths at A Level between 2002/03 and 2009/10. Until recently the Department had a target to ensure that all school laboratories were up to a good or excellent standard by 2010. However it did not collect routine data to measure progress against this target and the most recent research available found that science facilities were inadequate in around a quarter of secondary schools. Although recruitment of science graduates to train as specialist teachers has increased the Department is not on course to meet the targets set by the previous Government for recruiting more mathematics and physics teachers by 2014.
