Kroeber, 2020 China's economic growth has been revolutionary and is the foundation of its increasingly prominent role in world affairs It is the world's second biggest economy the largest manufacturing and trading nation the consumer of half the world's steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America Multinational companies make billions of dollars in profits in China each year while traders around the world shudder at every gyrations of the country's unruly stock markets Perhaps paradoxically its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip China is frequently in the news whether because of trade disputes the challenges of its Belt and Road initiative for global infrastructure or its increasing military strength China's political and technological challenges created by a country whose political system and values differ dramatically from most of the other major world economies creates uncertainty and even fear China's Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic and political story of the last three

decades Arthur Kroeber enhances our understanding of China's changes and their implications. Among the essential questions he answers are: How did China grow so fast for so long? How do China's changes affect the rest of the world? This thoroughly revised and updated second edition includes a comprehensive discussion of the origins and development of the US-China strategic rivalry including Trump's trade war and the race for technological supremacy. It also explores the recent changes in China's political system reflecting Xi Jinping's emergence as the most powerful leader since Mao Zedong. China's Uneven and Combined Development Steven Rolf, 2020-10-15. This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic accumulation system which remains a confounding hybrid of statist and neoliberal forms of capitalism as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its economy while GPNs enabled China to generate substantial export surpluses which could be recycled through state-owned banks as cheap credit and subsidies to large vertically integrated and politically controlled state-owned enterprises. In this way a synergy emerged between the neoliberal and Keynesian Fordist sectors of the economy while the national territorial state retained its form and expanded its functions. The book chronicles how this reliance on export surpluses however rendered China extremely vulnerable to external shocks prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008 even while sustaining the illusion of economic decoupling from the global economy. Finally it examines the growing role of the state in the current crisis-ridden economic model as well as China's current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas.

Economy IPE tradition this book addresses the negative consequences of globalisation what is termed here the dark side of globalisation It explores different definitions of globalisation whether the globalisation we have seen since the 1970s is substantially new and to what extent it can be governed Building on these foundations the work assesses the prospects for de globalisation By focusing on this dark side of globalisation the authors show how the global economic crisis and its various local and sectorial manifestations intensified rather than generated existing trends This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de globalisation
