## Oeuvres Sur Lamarck:

Lamarck, the founder of evolution Alpheus Spring Packard, 1901      **Lamarck, the Mythical Precursor** Madeleine Barthélemy-Madaule, 1982 This book presents a highly readable account of Lamarck's theories and the debates they generated. A child of the Enlightenment and supporter of the French Revolution, Lamarck emerges in this study as a bold and intellectually adventurous pioneer whose early work centered on meteorology and botany and who became the leading authority on invertebrates of his period. It strips away the myth of Lamarck as precursor to Darwin, making the case that the only way to see him or any figure in the history of science is within the scientific, religious, philosophical, and political context of his time rather than in the light of what we know now. Jean Baptiste Lamarck (1744-1829) was elected to the French Academy of Sciences yet he had to contend with scientific conservatism. Do not meddle with my Bible, Napoleon is said to have commanded the biologists; he eventually died penniless and blind, his work condemned. Despite its shaky status, Lamarckism, which holds that traits acquired during a creature's lifetime can be passed on to its offspring, is currently enjoying a resurgence of interest and has been the subject of several scientific papers and a host of experiments. Wrong theories tend to be avoided in discussions of the history of science, and the true value of Lamarck's work is only now beginning to be appreciated. This book does not attempt to rehabilitate Lamarck but instead places him in his milieu, showing that his theories are relevant to a problem still under discussion: the debate on innate versus acquired characteristics, providing a rich contribution to the history of ideas. Madeleine Barthélemy-Madaule is Professor of Philosophy at the University of Picardie and directs the Interdisciplinary Research Center in the History of Ideas there.      Oeuvres diverses réunies et rééditées Alfred Giard, 1911      *Oeuvres diverses réunies et rééditées par les soins d'un groupe d'élèves et d'amis* Alfred Mathieu Giard, 1911      **The Cambridge History of Eighteenth-century Philosophy** Knud Haakonssen, 2006 This two-volume set presents a comprehensive and up-to-date history of eighteenth-century philosophy. The subject is treated systematically by topic, not by individual thinker, school, or movement, thus enabling a much more historically nuanced picture of the period to be painted.      **Mémoires de la Société des antiquaires de Picardie**, 1907      Catalogue of the Books, Manuscripts, Maps and Drawings in the British Museum (Natural History) ... Amiens bibl., 1902      **Oeuvres** Alfred Giard, 1911      *The Natural and the Human* Stephen Gaukroger, 2016-01-21 Stephen Gaukroger presents an original account of the development of empirical science and the understanding of human behaviour from the mid-eighteenth century. Since the seventeenth century, science in the West has undergone a unique form of cumulative development in which it has been consolidated through integration into and shaping of a culture. But in the eighteenth century, science was cut loose from the legitimating culture in which it had had a public rationale as a fruitful and worthwhile form of enquiry. What kept it afloat?

between the middle of the eighteenth and the middle of the nineteenth centuries when its legitimacy began to hinge on an intimate link with technology. The answer lies in large part in an abrupt but fundamental shift in how the tasks of scientific enquiry were conceived from the natural realm to the human realm. At the core of this development lies the naturalization of the human that is attempts to understand human behaviour and motivations no longer in theological and metaphysical terms but in empirical terms. One of the most striking feature of this development is the variety of forms it took and the book explores anthropological medicine philosophical anthropology the natural history of man and social arithmetic. Each of these disciplines re formulated basic questions so that empirical investigation could be drawn upon in answering them but the empirical dimension was conceived very differently in each case with the result that the naturalization of the human took the form of competing and in some respects mutually exclusive projects. *Nineteenth-Century Britain and France* Snait B. Gissis, 2024-04-09 The book presents an original synthesizing framework on the relations between the biological and the social. Within these relations the late nineteenth century emergence of social sciences aspiring to be constituted as autonomous as scientific disciplines is described analyzed and explained. Through this framework the author points to conceptual and constructive commonalities conjoining significant founding figures Lamarck Spencer Hughlings Jackson Ribot Durkheim Freud who were not grouped nor analyzed in this manner before. Thus the book offers a rather unique synthesis of the interactions of the social the mental and the evolutionary biological. Spencerian Lamarckism and or Neo Lamarckism crystallizing into novel fields. It adds substantially to the understanding of the complexities of evolutionary debates during the last quarter of the nineteenth century. It will attract the attention of a wide spectrum of specialists academics and postgraduates in European history of the nineteenth century history and philosophy of science and history of biology and of the social sciences including psychology. *Index to the catalogue of books in the*

Stephen Mennell, 2017-10-03 In recent times especially under the influence of postmodernism culture has often been construed as a critique of modernity. This wide ranging and comprehensive collection of readings shows that such issues have always been at the centre of thought about the relationship between culture and civilization. The readings are divided into three sections linking the civilization debate to political theory to the cultural debate and to the sociology and anthropology. The substantial extracts included give students a rare chance to engage at length with classic texts to appreciate the nature of the battle between the Enlightenment and its critics which has shaped current thought. *Classical Readings on Culture and Civilisation* presents essays from Immanuel Kant Adam Ferguson Thomas Jefferson Alexis de
