Philosophizing Ad Infinitum Suny Series In Environmental Philosophy And Ethics:

Philosophizing ad Infinitum Marcel Conche, 2014-05-09 An original and insightful account of nature and our place in it from one of France's preeminent historians of philosophy One of France's preeminent historians of philosophy Marcel Conche has written and translated more than thirty five books and is recognized for his groundbreaking and authoritative work in Greek philosophy as well as on Montaigne In *Philosophizing ad Infinitum* one of his most remarkable and daring books Conche articulates a unique and powerful understanding of nature inclusive of humanity as infinite in time and space ever self renewing eternal and beyond complete understanding or control In today's world the notion of infinity is at the core of the crisis humanity faces understanding nature For the last two hundred years economies have been running at full speed fueled by the implicit belief that natural resources are infinite however it is clear that they are not and that humanity needs to radically rethink the foundations of environmental and economic systems Conche seeks to begin this rethinking illustrating along the way insightful and sometimes unorthodox ideas about Plato Aristotle Epicurus Montaigne Nietzsche Bergson and others *Philosophizing ad Infinitum* this book paints a perfect picture of the life of Marcel Conche a natural born philosopher His aptitude to question absolutely everything drove him to the pre Socratics even at an early age in his relentless quest for the truth With Montaigne the thinker to whom he feels most akin Marcel Conche stands tall as an exceptional figure in contemporary French philosophy renewing and enriching a great philosophical tradition Fran oise Dastur University of Nice Sophia Antipolis **SUNY Series in Environmental Philosophy and Ethics** ,20?? **The Incompleat Eco-Philosopher**

Anthony Weston, 2009-01-15 This collection of germinal work in the field by Anthony Weston presents his pragmatic environmental philosophy calling for reconstruction and imagination rather than deconstruction and analysis It is a philosopher's invitation to environmental ethics in an unexpectedly inviting and down to earth key On the pragmatic view advanced here environmental values are thoroughly natural what else could they be and are open ended and in flux Rather than passing judgment on the world as it is we are called to rediscover and remake the world as it might be We require an environmental etiquette more than a formal ethic an etiquette whose development must be an ongoing process and a process in turn that is genuinely multicentric challenging us to negotiate our place among the exuberant variety of living and other forms

Hans Jonas's Ethic of Responsibility Theresa Morris, 2013-11-01 Despite his tremendous impact on the German Green Party and the influence of his work on contemporary debates about stem cell research in the United States Hans Jonas's 1903-1993 philosophical contributions have remained partially obscured In particular the ontological grounding he gives his ethics based on a phenomenological engagement with biology to bridge the is-ought gap has not been fully appreciated Theresa Morris provides a comprehensive overview and analysis of Jonas's philosophy that reveals the thread that runs through all of his thought including his work on the philosophy of biology ethics the philosophy of technology and bioethics She places Jonas's philosophy in context comparing his ideas to those of other ethical and environmental philosophers and

demonstrating the relevance of his thought for our current ethical and environmental problems Crafting strong supporting arguments for Jonas s insightful view of ethics as a matter of both reason and emotion Morris convincingly lays out his account of the basis of our responsibilities not only to the biosphere but also to current and future generations of beings

A World Not Made for Us Keith R. Peterson,2020-09-01 In *A World Not Made for Us* Keith R Peterson provides a broad reassessment of the field of environmental philosophy taking a fresh and critical look at three classical problems of environmentalism the intrinsic value of nature the need for an ecological worldview and a new conception of the place of humankind in nature He makes the case that a genuinely critical environmental philosophy must adopt an ecological materialist conception of the human a pluralistic value theory that emphasizes the need for value prioritization and a stratified categorial ontology that affirms the basic principle of human asymmetrical dependence on more than human nature Integrating environmental ethics with the latest work in political ecology Peterson argues it is important to understand that the world is not made for us and that coming to terms with this fact is a condition for survival in future human and more than human communities of liberation and solidarity

Beyond the Land Ethic J. Baird Callicott,University Distinguished Research Professor J Baird Callicott,1999-01-01 A leading theorist addresses a wide spectrum of topics central to the field of environmental philosophy

Value, Beauty, and Nature Brian G Henning,2023-12 Argues that to make progress within environmental ethics philosophers must explicitly engage in environmental metaphysics

Emplotting Virtue Brian Treanor,2014-05-19 Despite its ancient roots virtue ethics has only recently been fully appreciated as a resource for environmental philosophy Other approaches dominated by utilitarian and duty based appeals for sacrifice and restraint have had little success in changing behavior even to the extent that ecological concerns have been embraced Our actions often do not align with our beliefs Fundamental to virtue ethics is an acknowledgment that neither good ethical rules nor good intentions are effective absent the character required to bring them to fulfillment Brian Treanor builds on recent work on virtue ethics in environmental philosophy finding an important grounding in the narrative theory of philosophers like Paul Ricoeur and Richard Kearney Character and ethical formation Treanor argues are intimately tied to our relationship with the narratives through which we view the human place in the natural world By reframing environmental questions in terms of individual social and environmental narratives about flourishing *Emplotting Virtue* offers a powerful vision of how we might remake our character so as to live more happily more sustainably and more virtuously in a diverse beautiful wondrous and fragile world

Earth Summit Ethics J. Baird Callicott,Fernando J. R. da Rocha,1996-08-23 On the eve of the 1992 Earth Summit in Rio de Janeiro Fernando J R da Rocha challenged environmental philosophers to suggest and develop effective ways in which universities might engender ecological literacy and environmental ethics The result was a preconference held in Porto Alegre Brazil whose aim was to put the summit in philosophical perspective influence its outcome and chart a new course linking environment and ethics through university education This book is an outgrowth of the Porto Alegre conference

and the international environmental philosophers and educators represented here inaugurate a constructive dialogue that will continue well into the twenty first century Among the contributors to the volume are environmental philosophers Andrew Brennan J Baird Callicott Fernando J R da Rocha and Holmes Ralston III and education theorists Peter Madsen and John Lemons In addition the book introduces English language readers to the work of French philosopher Catherine Larrere Spanish philosopher Nicholas Sosa and Brazil s radical former Secretary for the Environment and deep ecologist Jose Lutzenberger

Merleau-Ponty and Environmental Philosophy Suzanne L. Cataldi, William S. Hamrick, 2007-04-24 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau Ponty to environmental issues and builds a coherent philosophical ecology based on his thought The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau Ponty s work his concept of the bond between humanity and nature and his novel philosophies of perception embodiment and wild Being Eco phenomenologies of living places such as Central Park in New York City Midwestern farmlands and communal household dwellings of Pacific Northwest Coast people are closely examined The contributors also explore Merleau Ponty s philosophy for environmental ethics and develop notions such as vital values somatic empathy and interspecies sociality

For Love of Matter Freya Mathews, 2003-08-14 A bold and original work in ecocosmology and metaphysics

Toward Environmental Wholeness Patrick H. Byrne, 2024-03-01 Toward Environmental Wholeness proposes a new understanding of environmental wholeness that is needed to address the ethical challenges posed by environmental and climate crises Relying on the studies of numerous historians Patrick H Byrne traces the complex developments in environmental and climate change sciences and how they have posed complex ethical challenges Drawing upon the thought of Bernard Lonergan he shows how seemingly contradictory contributions from diverse ethical traditions can be brought together into a framework for responding to what the developing sciences are telling us about our current situation and evaluating our realistic options Byrne reveals how the limitations of a utilitarian approach to environmental ethics had to be expanded into more holistic approaches and the difficulties those approaches encountered especially the Romantic notions of a pristine unchanging nature to be preserved and humans as alien Environmental and climate change sciences have revealed the complex dynamic natural and human systems that now call for a more dynamic vision of the whole as the basis for environmental ethics The book also examines how the initiatives of Pope Francis Laudato si and the United Nations Strategic Development Goals are responding to these challenges

Environmental Philosophy Hugh P. McDonald, 2014-05-10 Environmental Philosophy A Revaluation of Cosmopolitan Ethics from an Ecocentric Standpoint calls for a new approach to ethics Starting from the necessity for all life of air water and food the book revalues the relation of ethics and environmentalism Using insights of the environmental ethicists environmental ethics becomes the model for ethics as a whole Humans are part of a larger environment Cosmopolitanism should be revised in accord with environmental ethics The book applies a new theory of values to the

relation of value and obligation and of duty rights and virtue to accord with ecocentrism The book also critically evaluates Utilitarianism and the self interest theory Other chapters address population species preservation and a practical program for environmental policy

Merleau-Ponty and Environmental Philosophy Sue L. Cataldi, William S. Hamrick, 2007 This richly diverse collection looks at the contemporary relevance of the philosophy of Maurice Merleau Ponty to environmental issues and builds a coherent philosophical ecology based on his thought The contributors describe and analyze relations within the natural world by focusing on the centrality of relations in Merleau Ponty s work his concept of the bond between humanity and nature and his novel philosophies of perception embodiment and wild Being Eco phenomenologies of living places such as Central Park in New York City Midwestern farmlands and communal household dwellings of Pacific Northwest Coast people are closely examined The contributors also explore Merleau Ponty s philosophy for environmental ethics and develop notions such as vital values somatic empathy and interspecies sociality

With Respect for Nature J. Claude Evans, 2012-02-01 We eat inevitably at the expense of other living creatures How can we take the lives of plants and animals while maintaining a proper respect for both ecosystems and the individuals who live in them including ourselves In this book philosopher J Claude Evans challenges much of the accepted wisdom in environmental ethics and argues that human participation in the natural cycles of life and death can have positive moral value With a guide for the nonphilosophical reader and set against the background of careful and penetrating critiques of Albert Schweitzer s principle of reverence for life and Paul Taylor s philosophy of respect for nature Evans uses hunting and catch and release fishing as test cases in calling for a robust sense of membership in the natural world The result is an approachable existential philosophy that emphasizes the positive value of human involvement in natural processes in which life and death giving and receiving self and other are intertwined

Skeptical Environmentalism Robert Joseph Kirkman, 2002-02-01 In Skeptical Environmentalism Robert Kirkman raises doubts about the speculative tendencies elaborated in environmental ethics deep ecology social ecology postmodern ecology ecofeminism and environmental pragmatism Drawing on skeptical principles introduced by David Hume Kirkman takes issue with key tenets of speculative environmentalism namely that the natural world is fundamentally relational that humans have a moral obligation to protect the order of nature and that understanding the relationship between nature and humankind holds the key to solving the environmental crisis Engaging the work of Kant Hegel Descartes Rousseau and Heidegger among others Kirkman reveals the relational worldview as an unreliable basis for knowledge and truth claims and more dangerously as harmful to the intellectual sources from which it takes inspiration Exploring such themes as the way knowledge about nature is formulated what characterizes an ecological worldview how environmental worldviews become established and how we find our place in nature Skeptical Environmentalism advocates a shift away from the philosopher s privileged position as truth seeker toward a more practical thinking that balances conflicts between values and worldviews

A Companion to Environmental Philosophy Dale Jamieson, 2008-04-15 A Companion

to Environmental Philosophy is a pioneering work in the burgeoning field of environmental philosophy This ground breaking volume contains thirty six original articles exemplifying the rich diversity of scholarship in this field Contains thirty six original articles written by international scholars Traces the roots of environmental philosophy through the exploration of cultural traditions from around the world Brings environmental philosophy into conversation with other fields and disciplines such as literature economics ecology and law Discusses environmental problems that stimulate current debates

Environmental Philosophy Simon P. James, 2015-06-03 Climate change habitat loss rising extinction rates such problems call for more than just new policies and practices They raise fundamental questions about the world and our place in it What for instance is the natural world Do we humans belong to it Which parts of it are we morally obliged to protect Drawing on an exceptionally wide range of sources from virtue ethics to Buddhism leading environmental philosopher Simon P James sets out to answer these vitally important questions The book begins with a discussion of animal minds before moving on to explore our moral relations with non human organisms ecosystems and the earth as a whole James then considers environmental aesthetics humanity s place in the natural world and the question of what it means to be wild In the concluding chapter he applies his findings to the topic of global climate change building a strong moral case for urgent action This accessible entertainingly written book will be essential reading for students of the environment across the humanities and social sciences It will moreover be an ideal guide for anyone keen to deepen their understanding of environmental issues
