Keeping Minds Happy and Healthy is a practical resource for teachers and shows how pupils can achieve and maintain excellent mental health. It focuses on identifying the main causes of unhappiness, stress and anxiety by examining the difficulties a school system can inadvertently create for pupils. By developing resilience, empathic behaviour, social skills and self respect during childhood, pupils will be better equipped to withstand the pressures of modern society and growing up. With practical tip sheets and advice, Keeping Minds Happy and Healthy suggests ways to create a more positive educational experience for all pupils. Pat Guy shows how schools can increase all pupils' well-being, enabling them to deal with the challenging situations they face as they move through education and into the adult world.

Handbook of College Science Teaching Joel J. Mintzes, 2006. The Handbook offers models of teaching and learning that go beyond the typical lecture laboratory format and provides rationales for new practices in the college classroom. It is ideal for graduate teaching assistants, senior faculty and graduate coordinators and mid-career professors in search of reinvigoration.

The Art of Teaching Science Jack Hassard, Michael Dias, 2013-07-04. The Art of Teaching Science emphasizes a humanistic, experiential and constructivist approach to teaching and learning and integrates a wide variety of pedagogical learning tools. These tools involve inquiry and experimentation, reflection through writing and discussion, as well as experiences with students, science curriculum and pedagogy. Becoming a science teacher is a creative process, and this innovative textbook encourages students to construct ideas about science teaching through their interactions with peers, professionals and instructors, and through hands-on activities designed to foster a collaborative, thoughtful learning environment.

Hands-On Science, Level 6 Jennifer Lawson, 2000. This teacher resource offers a detailed introduction to the Hands On Science program, which includes its guiding principles, implementation guidelines, an overview of the science skills that grade 6 students use and develop, and a classroom assessment plan complete with record-keeping templates. The guide has four instructional units: Unit 1 Diversity of Living Things, Unit 2 Flight, Unit 3 Electricity, and Unit 4 The Solar System. Each unit is divided into lessons that focus on specific curricular outcomes. Each lesson has materials lists, activity descriptions, questioning techniques, activity centre and extension ideas, assessment suggestions, activity sheets and visuals.
