The Roeper School Don Ambrose, Bharath Sriraman, Tracy L. Cross, 2013-12-30 How can we design schools that energetically promote intellectual development while also attending to the social emotional and ethical growth of students In today's frenzied climate of accountability driven school reform it is difficult to establish anything more than achievement of superficial knowledge and skill Fortunately there is a vibrant example of holistic student centered education that engenders dynamic multidimensional student growth The Roeper School enables students to develop strong intrinsic motivation as they discover aspirations and develop talents consistent with those aspirations Simultaneously from a very young age students take considerable

responsibility for their own actions and for the processes that go on in their school Following the Roeper philosophy each student generates a long term sense of purposeful direction a strong sense of intrapersonal awareness impressive creative and critical thinking skills and a finely tuned sense of ethical responsibility Upon graduation Roeper students are well prepared to find or create highly productive niches in the world of work and rewarding personal lives while serving as mature ethical citizens of a complex 21st century globalized society This book includes descriptions of the multidimensional education the Roeper School provides The perspectives in the volume are diverse coming from leading researchers and theorists in the field of gifted education as well as teachers administrators alumni and current students from the school itself Overall the book provides a beacon of hope for 21st century education

Logic and Critical Thinking in the Biomedical Sciences Jules J. Berman,2020-07-03 Science is not a collection of facts Science is the process by which we draw inferences from facts Volume

Logic and Critical Thinking in the Biomedical Sciences invites readers to linger over a collection of common observations to see what inferences can be drawn when one applies a bit of deductive logic. If we just think about what we observe, it is often possible to discover profound biomedical insights. Volumes 1 and 2 of Logic and Critical Thinking in the Biomedical Sciences are written for biomedical scientists and college-level students engaged in any of the life sciences, including bioinformatics and related data sciences. Provides a strong introduction to deductive methods that can be directly applied to the biomedical sciences. Using hundreds of examples shows how creative scientists draw important inferences from observations that are often ignored by their peers. Discusses complex biological and medical concepts in a relaxed manner intended to focus the reader's attention on the deductive process without dwelling excessively on details. **Pediatric**

Primary Care - E-Book Catherine E. Burns, Ardys M. Dunn, Margaret A. Brady, Nancy Barber Starr, Catherine G.

Blosser, 2012-02-14 Covering the full spectrum of health conditions seen in the primary care of children, Pediatric Primary Care, 5th Edition, emphasizes both prevention and management from the unique perspective of the Nurse Practitioner. Written by an expert editor/contributor team, it provides in-depth, evidence-based guidance for assessing and managing health problems in children from infancy through adolescence. Other key topics include developmental theory, the health status of children today, issues of daily living and cultural considerations. Four-part organization includes an introductory unit plus units on child development, the health management of children and diseases and disorders common to childhood. UNIQUE Functional health patterns framework in Unit Three provides a lens for discussing health promotion through the various components of healthy living. UNIQUE ICD framework in Unit Four addresses the classification used to code diseases in both hospital and outpatient settings. UNIQUE Practice management chapter provides need-to-know information on managing a private healthcare practice, including issues of productivity, compliance with applicable laws, quality of care indicators, and successful business practices. UNIQUE Environmental health chapter offers evidence-based content on the effects of environmental toxicants such as tobacco smoke, heavy metals, and air pollutants. An 8-page color insert presents over 40 photos that visually demonstrate key assessment findings for ear, skin, and other conditions. NEW Pediatric Pain Management chapter addresses the increased recognition of pain as the fifth vital sign, with expanded coverage of acute and chronic pain management in children. Extensively revised and updated genetics chapter presents a new paradigm for addressing genetic considerations in clinical practice, including an introduction to epigenetics. Increased emphasis on health disparities explores the growing health disparities among children in the U.S. and worldwide and provides strategies to help patients and parents gain accessibility to health care resources. NEW Content on implementing a medical home explores the trend toward family-centered, coordinated health care and fosters appropriate treatment for children with chronic disease. NEW Updated coverage takes a more global approach, exploring the health status of children outside the U.S. Expanded imaging content offers valuable guidance on using various imaging modalities, including how to prepare the child for diagnostics. **Private**
