#### Test Bank

#### MULTIPLE CHOICE

1. When performing a physical assessment, the technique the nurse will always use first is:

|    |               |
|----|---------------|
| A) | palpation.    |
| B) | inspection.   |
| C) | percussion.   |
| D) | auscultation. |

ANS: B

The skills requisite for the physical examination are inspection, palpation, percussion, and auscultation. The skills are performed one at a time and in this order (with the exception of the abdominal assessment, where auscultation takes place before palpation and percussion). The assessment of each body system begins with inspection. A focused inspection takes time and yields a surprising amount of information.

PTS: 1 DIF: Cognitive Level: Remembering (Knowledge)

REF: Pages: 115-116

MSC: Client Needs: Safe and Effective Care Environment: Management of Care

2. The nurse is preparing to perform a physical assessment. Which statement is true about the inspection phase of the physical assessment?
