Film response

The film presents the character Peter the high as the iconic figure and force of revolution for the Russian Empire. Many of the attributes awarded to the ruler depict that he was the only leading personality that transformed the history of Russia given its predominant historical recognition at the international platform. Born in Moscow, the nobleman held a strategic position in the Russia Empire since he father was one of the many Russian rulers to exist in history. In the film, the audience is introduced to a character of compelling influence in the sense that he commands servants and a powerful army.

Peter is presented as an intellectual and boisterous lad who has hatred for some Russian community members that had invaded their house and executed his family. The anger and frustration he experienced at that age of 10 gave him the courage to pursue his family's murderers and eventually avenge their death. The character role is adequately developed in the film with Dmitri Zolotukhin acting as the Peter the great. The historical 16th-century film is worth appreciating given the cinematographic elements employed to build Peter's important character. In the movie, it is evident that Peter struggled to establish a great lasting emperor that would scare the world given the supremacy that Russians have to be granted by other global nations.

Peter acted beyond the expectations of the ordinary tsar since he exhibited certain features that would only be viewed as dictatorial. He reconstructed the Russian empire by building trade industries, the military and national heritage. In his reasoning, there was a need to shape the country into an independent state that acted on its own. For that reason, he forced his subjects to dress in a particular manner, communicate with Russian troops and talk like a unique state. The film director, Sergei Gerasimov ensured that the film had enlightened various aspects of the development of the Russian customs and origin of the many traditions witnessed in the modern day nation.

The Russian Empire had a defined structure during the 16th century. Features of the empire included a strict observation of the Orthodox Church regulation and full adherence to succession rules. Peter stayed within the standards of the Orthodox Church and was a successor from their lineage. In the film, it is evident that he remained loyal to the hereditary monarch system by assuming power after his father's death. Peter gained full access to seas after a battle with Turkey. As such, he is viewed to have established an effective policy that counteracted outside pressure and military prowess. He used the naval power to navigate into the Black Sea and capture Azov of the Crimean Tatar. Such attributes depict his true nature in real life which have close similarities to the feature illustrated in the film. In my understanding, the movie has d

Film Theory and Contemporary Hollywood Movies Warren Buckland,2009-06-03 Film theory no longer gets top billing or plays a starring role in film studies today as critics proclaim that theory is dead and we are living in a post theory moment While theory may be out of the limelight it remains an essential key to understanding the full complexity of cinema one that should not be so easily discounted or discarded In this volume contributors explore recent popular movies through the lens of film theory beginning with industrial economic analysis before moving into a predominately aesthetic and interpretive framework The Hollywood films discussed cover a wide range from 300 to Fifty First Dates from Brokeback Mountain to Lord of the Rings from Spider Man 3 to Fahrenheit 9 11 from Saw to Raiders of the Lost Ark and much more Individual essays consider such topics as the rules that govern new blockbuster franchises the posthumanist realism of digital cinema video game adaptations increasingly restricted stylistic norms the spatial stories of social networks like YouTube the mainstreaming of queer culture and the cognitive paradox behind enjoyable viewing of traumatic events onscreen With its cast of international film scholars Film Theory and Contemporary Hollywood Movies demonstrates the remarkable contributions theory can offer to film studies and moviegoers alike

In-situ Materials Characterization Alexander Ziegler,Heinz Graafsma,Xiao Feng Zhang,Joost W.M. Frenken,2014-04-01 The behavior of nanoscale materials can change rapidly with time either because the

environment changes rapidly or because the influence of the environment propagates quickly across the intrinsically small dimensions of nanoscale materials. Extremely fast time resolution studies using X rays, electrons and neutrons are of very high interest to many researchers and is a fast evolving and interesting field for the study of dynamic processes. Therefore, in situ structural characterization and measurements of structure property relationships covering several decades of length and time scales from atoms to millimeters and femtoseconds to hours with high spatial and temporal resolutions are crucially important to understand the synthesis and behavior of multidimensional materials. The techniques described in this book will permit access to the real time dynamics of materials surface processes and chemical and biological reactions at various time scales. This book provides an interdisciplinary reference for research using in situ techniques to capture the real time structural and property responses of materials to surrounding fields using electron optical and x ray microscopies e.g. scanning transmission and low energy electron microscopy and scanning probe microscopy or in the scattering realm with x ray neutron and electron diffraction.

Media Violence and Children Douglas A. Gentile, 2014-09-30 Stripping away the hype this book describes how when and why media violence can influence children of different ages giving parents and teachers the power to maximize the media's benefits and minimize its harm. There are many opinions about media violence and children but not all are supported by science. In this book the top experts gather the latest results from 50 years of scientific study as the basis for a comprehensive in depth examination of the complex issues surrounding the effects of media violence of different types. Each chapter focuses on a particular issue of concern including hot topics such as brain development, cyber bullying, video games and verbal aggression. Articles take into account factors such as economics, differences based on the ages of children and differences between types of media violence. This book provides the information parents and those who work with families need to make the best choices. It includes chapters specifically relevant to the types of bullying schools have the most trouble identifying and controlling. Most importantly the writing is both intelligent and accessible so that parents, educators, pediatricians and policymakers can understand and apply the findings presented.

Current Research in Film, 1987 *Introduction to Ultrathin Silica Films* Shamil Shaikhutdinov, 2022-08-25 Silica is one of the key materials in many modern technological applications. Further miniaturization of nanoelectronic devices necessitates rational design of ultrathin silica films on electrically conductive substrates. This is the first ever book on the preparation and atomic level description of ultrathin silica films grown on metal substrates. Experimental and theoretical studies performed in recent years provide compelling evidence of the growth of well ordered silica films that exhibit the structural motif of sheet silicates. A growing body of research suggests that a single layer silicate which received the name silicatene by analogy with the famous graphene should be included in the family of truly two dimensional materials. In addition the silicate films modified with metals such as Al and Fe offer a unique possibility to study the surface structures and hence the surface chemistry of natural silicates e.g. clays and zeolites. Finally ultrathin silica films represent well defined model systems for elucidating the
