Newfoundland Hunting And Trapping Guide:

Conservation Directory ,1987 *Community Forestry in Canada* Sara Teitelbaum,2016-07-28 In recent decades community forestry has taken root across Canada Locally run initiatives are lauded as welcome alternatives to large corporate and industrial logging practices yet little research has been done to document their tangible outcomes or draw connections between their ideals of local control community benefit ecological stewardship and economic diversification and the realities of community forestry practice This book brings together the work of over twenty five researchers to provide the first comparative and empirically rich portrait of community forestry policy and practice in Canada Tackling all of the forestry regions from Newfoundland to British Columbia it unearths the history of community forestry revealing surprising regional differences linked to patterns of policy making and cultural traditions Case studies celebrate innovative practices in governance and ecological management while uncovering challenges related to government support and market access The future of the sector is also considered including the role of institutional reform multiscale networks and adaptive management strategies *The Subjugation of Canadian Wildlife* Max Foran,2018-04-10 Hardly a day goes by without news of the extinction or endangerment of yet another animal species followed by urgent but largely unheeded calls for action An eloquent denunciation of the failures of Canada s government and society to protect wildlife from human exploitation Max Foran s *The Subjugation of Canadian Wildlife* argues that a root cause of wildlife depletions and habitat loss is the culturally ingrained beliefs that underpin management practices and policies Tracing the evolution of the highly contestable assumptions that define the human wildlife relationship Foran stresses the price wild animals pay for human self interest Using several examples of government oversight at the federal provincial and territorial levels from the Species at Risk Act to the Biodiversity Strategy Protected Areas Network and provincial management plans this volume shows that wildlife policies are as much or more about human needs priorities and profit as they are about preservation Challenging established concepts including ecological integrity adaptive management sport hunting as conservation and the flawed belief that wildlife is a renewable resource the author compels us to recognize animals as sentient individuals and as integral components of complex ecological systems A passionate critique of contemporary wildlife policy *The Subjugation of Canadian Wildlife* calls for belief change as the best hope for an ecologically healthy wildlife rich Canada **Conservation Directory 2000** National Wildlife Federation,1999 The Lyons Press is proud to present the forty fifth annual edition of the National Wildlife Federation s *Conservation Directory* of U S and international organizations and agencies working to protect the environment the most vital resource of its kind Included are members of the United States Congress government agencies citizens groups educational institutions databases services periodicals and other directories federally protected conservation areas indexes and more This annual directory is essential for colleges and universities libraries environmental activists students outdoor writers science editors natural resource agencies those seeking employment in the field of conservation researchers and all
