

YOUR SAFETY AT WORK INJURY REPORTING

**SAFETY
FIRST**

**REPORT
ALL INJURIES
AT ONCE**

Injuries must be reported so that you can be supported

Workplace injuries can range from physical cuts and lacerations to pain from repetitive lifting and manual handling. Labourpower is committed to taking all reported injuries seriously and will work to ensure that:

- ✓ All injured workers get the support and help needed
- ✓ We review practices to improve workplace health and safety

No matter how small the injury may appear, it's important to report the incident and injury early

Safety is no accident

Understanding the cause of an injury can help reduce work-related injuries and illnesses. ALL injuries (including those that occur outside the workplace) should be reported even if these injuries seem minor. Reporting an injury helps to:

Make sure you
receive appropriate
treatment and care

Ensure any safety
issues at work
are addressed

Prevent any
re-occurrence of an
incident or injury

Always report an injury to your supervisor and Labourpower representative - not a co-worker

NOTICE

**REPORT
ALL INJURIES
AT ONCE**

It's important to report all injuries

Labourpower has resources available no matter where you work. This ranges from general information to qualified medical professionals who can assist with treatment plans as well as preventative care. It's key for you to:

- ✓ Know what actions to take if you are involved in an incident or injury at work
- ✓ Follow all safety measures and practices in place at the host client
- ✓ Understand the danger of the risks and identified hazards around you
- ✓ Pay attention to all safety messages, signs and follow your training
- ✓ Report all injuries and incidents to your supervisor, no matter how small

IMPORTANT: The sooner an incident or injury is reported then the sooner Labourpower can seek treatment for you and provide you with appropriate care

Safety Goes 24/7

If you are ever in doubt, always stop and ask for help.
Remember to report any issues to your supervisor immediately.

Disclaimer: The information contained on this flyer is general in nature and does not take into account your personal situation

Child Injury and the Determinants of Health Amy Peden, Richard Franklin, 2021-03-23

The World Health Organization recognizes that injuries are the leading cause of death and disability to children after their first birthday

There is also high morbidity associated with injuries sustained in childhood often affecting people for the rest of their lives

For every child who dies from injury there are several thousand who require medical care many who live with varying degrees of disability

Children and adolescents 0-19 years of age are at increased risk of mortality and morbidity due to injuries such as road traffic burns falls poisoning drowning self harm and interpersonal violence

There are proven ways to prevent many child injuries yet there are still gaps in our knowledge

By understanding the impact of determinants of health i.e. the social and economic environment the physical environment and a person's individual characteristics and behaviors effective prevention interventions can be designed and implemented with a high return on investment

This Special Issue covers an eclectic range of studies the common goal of which is to reduce the global burden of child injury related mortality and morbidity
