Strangers Next Door? Tim Lindsey, Dave McRae, 2018-02-22 There are no two neighbouring countries anywhere in the world that are more different than Indonesia and Australia. They differ hugely in religion, language, culture, history, geography, race, economics, worldview, and population. Indonesia 270 million, Australia less than 10 per cent of that. In fact, Indonesia and Australia have almost nothing in common other than the accident of geographic proximity. This makes their relationship turbulent, volatile, and often unpredictable. *Strangers Next Door* brings together insiders and leading observers to critically assess the state of Australia-Indonesia relations and their future prospects, offering insights into why the relationship is so important for Australia, why it is so often in crisis, and what this means for the future. This book will be of interest to anyone concerned with the Indo-Pacific region, Southeast Asia, Australia, and Indonesia, and each country's politics, economy, and foreign policy. It contains chapters that will interest specialists but are written in a style accessible to a general audience. The book spans a diverse range of subjects, including political relations and diplomacy, security and defence, the economy and trade, Islam, education, development, the arts, legal cooperation, the media, women, and community ties. Contributors assess the current state of relations in their sphere of expertise and outline the factors and policies that could shape bilateral ties and Indonesia's future over the coming decades. University of Melbourne scholars Tim Lindsey and Dave McRae, both prominent observers and commentators on Indonesia and its relations with Australia, edited the volume, providing a synthesising overview as well as their own thematic chapters.

Data-Driven Business Decisions Chris J. Lloyd, 2011-10-25 A hands-on guide to the use of quantitative methods and software for making successful business decisions. The appropriate use of quantitative methods lies at the core of successful decisions made by managers, researchers, and students in the field of business. Providing a framework for the development of sound judgment and the ability to utilize quantitative and qualitative approaches, *Data-Driven Business Decisions* introduces readers to the important role that data plays in understanding business outcomes, addressing four general areas that managers need to know about: data handling and Microsoft Excel, uncertainty, the relationship between inputs and outputs, and complex decisions with trade-offs and uncertainty. Grounded in the author's own classroom approach to business statistics, the book reveals how to use data to understand the drivers of business outcomes, which in turn allows for data-driven business decisions. A basic, non-mathematical foundation in statistics is provided, outlining for readers the tools needed to link data with business decisions, account for uncertainty in the actions of others, and in patterns revealed by data. Handle data in Excel, translate their analysis into simple business terms, and present results in simple tables and charts. The author discusses key data analytic frameworks such as decision trees and multiple regression, and also explores additional topics including Use of the Excel functions Solver and Goal Seek, Partial correlation, and auto correlation, Interactions, and proportional variation in regression models, Seasonal adjustment, and what it reveals. Basic portfolio theory as an introduction to correlations. Chapters are introduced with case studies that integrate

simple ideas into the larger business context and are followed by further details raw data and motivating insights Algebraic notation is used only when necessary and throughout the book the author utilizes real world examples from diverse areas such as market surveys finance economics and business ethics Excel add ins StatproGo and TreePlan are showcased to demonstrate execution of the techniques and a related website features extensive programming instructions as well as insights data sets and solutions to problems included in the material Data Driven Business Decisions is an excellent book for MBA quantitative analysis courses or undergraduate general statistics courses It also serves as a valuable reference for practicing MBAs and practitioners in the fields of statistics business and finance Knowledge in Perspective Ernest Sosa,1991-03-29 Ernest Sosa collects essays written over the last 25 years on the scope and nature of human knowledge Air Force Pamphlet ,1966 **Aware** ,1990 **Dictionary of Greek and Roman Biography and Mythology** William Smith,1849 **Gentleman's Magazine and Historical Review** ,1885 The Gentleman s magazine section is a digest of selections from the weekly press the Trader s monthly intelligencer section consists of news foreign and domestic vital statistics a register of the month s new publications and a calendar of forthcoming trade fairs *The Works of William Shakespeare: King Richard III.
