Righteousness in the Book of Proverbs Sun Myung Lyu,2012 This study brings insights from character ethics in addition to the much discussed biblical scholarship on social justice in order to elucidate the concept of righteousness present in the book of Proverbs The author s choice of Proverbs as a wisdom text in relation to the concept of righteousness reflects the realization that previous scholarship has not dealt with righteousness as a concept in its own right but as a corollary to the issue of social justice Like character ethics Proverbs use its depiction of the righteous person as its prominent pedagogic device of moral discourse In other words instead of offering abstract statements about morality Sun Myung Lyu portrays the life of the righteous person as the paradigm of moral life which is pregnant with numerous realizations into specific actions befitting diverse life situations What the righteous person embodies is righteousness the character in toto which encompasses yet transcends specific virtues and actions After presenting a comparative study of Proverbs with the Psalms and the ancient Egyptian wisdom texts the author concludes that despite many similarities and parallels Proverbs still stands out in its strong emphasis on character formation and internalization of virtues as foundations of morality in general and righteousness in particular

Ecohydrology in a

Changing Environment Shavkat Kenjabaev, 2014-11-25 The complex of ecological problems in Central Asia especially in Uzbekistan is linked to rapid ongoing demographic and economic processes. However, geographical location has its own peculiarity. Aridity of the climate in Uzbekistan makes water resources the main limiting factor for sustainable economic development. Chub et al 1998 RECCA 2011 Annual precipitation ranging from 80-200 mm in plain to 300-400 mm in foothills and 600-800 mm in mountain rangelands. Chub 2007 is considerably lower than the evaporation demand of the atmosphere. FAO IPTRID et al 2004 Thus agriculture accounting about 90% withdrawal of total available water resources in Uzbekistan is impossible without irrigation. Qadir et al 2009 Moreover agricultural production is highly vulnerable to climate change. Lioubimtseva Henebry 2009 High fluctuation of precipitation and temperature increase may influence land use in irrigated lands, create difficulties in water management at regional and local scales and increase competition of scarce water resources among water users in various sectors.
