ENDORSEMENTS The educational impact of the COVID 19 pandemic has created the most serious crisis in the history of public education. Addressing this crisis effectively will require efforts aligned with an inclusive and sustainable vision of development such as articulated by the UN Education 2030 and the Sustainable Development Goals. To build back better, educators need to guide their practice by knowledge that is local as well as global, in ways that help their students understand those interdependencies. Beyond Provincialism is an invitation to such an exploration. In this edited volume, Professors Mahmoud Suleiman and Tonya Huber and their colleagues take the reader on a journey that illuminates the impact of hunger among college students in America, how the SDGs can help turnaround high poverty schools, the role of curriculum to promote cross national collaboration, and how math and science instruction as well as study abroad can help students develop procedural and conceptual knowledge that makes visible the relevance of what they learn to the world around them, and the impact of the pandemic on teacher preparation in Palestine. The kaleidoscope of insights offered by this book will expand the global awareness and understanding of education as a global activity. A timely and useful resource for teachers and teacher educators that will contribute to advance a transformational education that helps us build back better from the devastation created by the pandemic.
