Caubergs,2013-06-29 Oxidation reduction i e redox processes at the plasma membrane of any cell have been attracting more and more attention both in basic and in applied research since the first workshop dealing with the plasma membrane oxidoreductases was organized in Cordoba Spain in 1988 This evolution is evident considering the numerous cell functions performed by plasma membrane redox systems not only in healthy cells but also in cells that escaped from the normal metabolic control e g cancer cells and cells under attack by pathogens Plasma membrane redox processes have now been demonstrated to play an essential role in growth control and defense mechanisms of these cells The great importance of the plasma membrane redox systems originates in the fact that they are located in the membrane which is essentially the site of communication between the living cell and its environment We may say that the plasma membrane can be considered as the sensory part of the cell No chemical substance can enter the cell interior without interaction with the plasma membrane

Unschuld,2003-04-08 The Huang Di nei jing su wen known familiarly as the Su wen is a seminal text of ancient Chinese medicine yet until now there has been no comprehensive detailed analysis of its development and contents At last Paul U Unschuld offers entry into this still vital artifact of China s cultural and intellectual past Unschuld traces the history of the Su wen to its origins in the final centuries B C E when numerous authors wrote short medical essays to explain the foundations of human health and illness on the basis of the newly developed vessel theory He examines the meaning of the title and the way the work has been received throughout Chinese medical history both before and after the eleventh century when the text as it is known today emerged Unschuld s survey of the contents includes illuminating discussions of the yin yang and five agents doctrines the perception of the human body and its organs qi and blood pathogenic agents concepts of disease and diagnosis and a variety of therapies including the new technique of acupuncture An extensive appendix furthermore offers a detailed introduction to the complicated climatological theories of Wu yun liu qi five periods and six qi which were added to the Su wen by Wang Bing in the Tang era In an epilogue Unschuld writes about the break with tradition and innovative style of thought represented by

the Su wen For the first time health care took the form of medicine in that it focused on environmental conditions climatic agents and behavior as causal in the emergence of disease and on the importance of natural laws in explaining illness Unschuld points out that much of what we surmise about the human organism is simply a projection reflecting dominant values and social goals and he constructs a hypothesis to explain the formation and acceptance of basic notions of health and disease in a given society Reading the Su wen he says not only offers a better understanding of the roots of Chinese medicine as an integrated aspect of Chinese civilization it also provides a much needed starting point for discussions of the differences and parallels between European and Chinese ways of dealing with illness and the risk of early death **Intermediate**
