**Global Climate Change** James C. White, 2012-12-06 Bacteria in a test tube and humans on our planet follow the same population curve as time elapses We on this earth largely through control of disease are rapidly approaching maximum population and through energy demands are using up our resources and accumulating wastes We have come to realize the danger of a maturing system but have made essentially no impact in mitigating or preventing the problems we face While we have been able to change the world we live in most of our effects have been to degrade the planet We have nibbled away at the quality of the atmosphere for centuries and the accumulated damage has resulted in changing the world's climate at an ever increasing rate We now face the possibility of higher average temperatures over most of our planet changing patterns of rainfall rising sea levels aggravated storm systems and a myriad of social effects *Assessment and Teaching of 21st Century Skills* Patrick Griffin, Barry McGaw, Esther Care, 2011-10-20 Rapid and seemingly accelerating changes in the economies of developed nations are having a proportional effect on the skill sets required of workers in many new jobs Work environments are often technology heavy while problems are frequently ill defined and tackled by multidisciplinary teams This book contains insights based on research conducted as part of a major international project supported by Cisco Intel and Microsoft It faces these new working environments head on delineating new ways of thinking about 21st century skills and including operational definitions of those skills The authors focus too on fresh approaches to educational assessment and present methodological and technological solutions to the barriers that hinder ICT based assessments of these skills whether in large scale surveys or classrooms Equally committed to defining its terms and providing practical solutions and including international perspectives and comparative evaluations of assessment methodology and policy this volume tackles an issue at the top of most educationalists' agendas *Our Biggest Experiment* Alice Bell, 2021-09-21 Traversing science politics and technology *Our Biggest Experiment* shines a spotlight on the little known scientists who sounded the alarm to reveal the history behind the defining story of our age the climate crisis Our understanding of the Earth's fluctuating environment is an extraordinary story of human perception and scientific endeavor It also began much earlier than we might think In *Our Biggest Experiment* Alice Bell takes us back to climate change science's earliest steps in the eighteenth and nineteenth centuries through the point when concern started to rise in the 1950s and right up to today where the debate is over and the world is finally starting to face up to the reality that things are going to

get a lot hotter a lot drier in some places and a lot wetter in others with catastrophic consequences for most of Earth's biomes Our Biggest Experiment recounts how the world became addicted to fossil fuels how we discovered that electricity could be a savior and how renewable energy is far from a twentieth century discovery Bell cuts through complicated jargon and jumbles of numbers to show how we're getting to grips with what is now the defining issue of our time The message she relays is ultimately hopeful harnessing the ingenuity and intelligence that has driven the history of climate change research can result in a more sustainable and bearable future for humanity *A History of UNESCO* Poul Duedahl,2016-04-12 The mission UNESCO as defined just after the end of World War II is to build the defenses of peace in the minds of men In this book historians trace the routes of selected UNESCO mental engineering initiatives from its headquarters in Paris to the member states to assess UNESCO's global impact *A Homology Theory for Smale Spaces* Ian F. Putnam,2014-09-29 The author develops a homology theory for Smale spaces which include the basic sets for an Axiom A diffeomorphism It is based on two ingredients The first is an improved version of Bowen's result that every such system is the image of a shift of finite type under a finite to one factor map The second is Krieger's dimension group invariant for shifts of finite type He proves a Lefschetz formula which relates the number of periodic points of the system for a given period to trace data from the action of the dynamics on the homology groups The existence of such a theory was proposed by Bowen in the 1970s *Law, Death, and Robots* Keri Grieman,2024-10-17 Can the law keep up with AI This book examines liability and regulation for artificial intelligence causing serious physical harm both now and in the future While AI moves quickly regulation follows more slowly an increasing problem for an evolutionary fast paced emerging technology AI has the potential to save lives but in doing so will have the potential to take them as well How do we future proof law and regulation to incentivise life saving innovation as safely as possible This book details how to regulate AI in high risk civil applications for example automated vehicles and medicine addressing both liability and regulatory structure It highlights crucial liability themes for technology governance provides tools to bridge the gap between regulators and technologists examines jurisdictional approaches to AI regulation in the EU UK USA and Singapore and ultimately suggests a jurisdiction agnostic blueprint for regulation **Cities** Ian Douglas,2013-05-30 Cities are amongst our greatest creations Yet at the start of the twenty first century there is increasing concern over their unchecked expansion and the detrimental effect this is having on the planet as induced climate change and ever increasing demands upon the world's resources take effect How can we make the world's cities more sustainable Ian Douglas tells the story of cities why they exist how they have evolved the problems they have encountered and those they will face as our century progresses Global in geographical coverage and ranging from the cities of the classical world to the megacities of today it is the first comprehensive environmental history of cities **Geology and Geologic Hazards of the Blue Ridge** Arthur J. Merschat,Mark W. Carter,2024-05-16 The three field guides in this volume explore facets of the geology of western North Carolina USA The trip to Buck Creek and Chunky Gap Mountain examines high temperature mafic

and ultramafic rocks interpreted to be part of a dismembered ophiolite thrust onto Laurentian crust during the Taconic orogeny The second trip traverses rugged terrain along the Blue Ridge Escarpment from near the South Carolina state line to Hickory Nut Gorge just southeast of Asheville to examine rockfalls rockslides debris flows and debris slides triggered by extreme rainfall events The trip to Sparta North Carolina highlights the results of interdisciplinary studies among collaborators following the 2020 Mw 5.1 earthquake      *The impact of spending cuts on science and scientific research* Great Britain: Parliament: House of Commons: Science and Technology Committee, 2010-03-25 The pressure to be seen to be making cuts across the public sector is threatening to undermine both the Government's good record on investment in science and the economic recovery Whilst the contribution of a strong domestic science base is widely acknowledged methodological problems with quantifying its precise value to the economy mean that it is in danger of losing out in Whitehall negotiations Scientists are under increasing pressure to demonstrate the impact of their work and there is concern that areas without immediate technology applications are being undervalued The Committee believes the Government faced a strategic choice invest in areas with the greatest potential to influence and improve other areas of spending or make cuts of little significance now but that will have a devastating effect upon British science and the economy in the years to come

Evidence check 2 Great Britain: Parliament: House of Commons: Science and Technology Committee, 2010-02-22 Examines the Government's policies on the provision of homeopathy through the National Health Service NHS and the licensing of homeopathic products by the Medicines and Healthcare products Regulatory Agency MHRA      Multidisciplinary Studies in Knowledge and Systems Science Yang, Guangfei, 2013-05-31 This book brings together valuable research on the adoption of a systems approach to the theory and practice of managing information and people in knowledge intensive activities and processes Provided by publisher
