A History of Scientific Journals Aileen Fyfe, Noah Moxham, Julie McDougall-Waters, Camilla Mørk Røstvik, 2022-10-03

Modern scientific research has changed so much since Isaac Newton's day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers. Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton's day to ours. Scientific journals are now central to academic research and careers. Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published. The journal that reported Newton's optical experiments still exists. First published in 1665 and now fully digital the *Philosophical Transactions* has carried papers by Charles Darwin, Dorothy Hodgkin and Stephen Hawking. It is now one of eleven journals published by the Royal Society of London. Unrivalled insights from the Royal Society's comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing. The editorial management business practices and financial difficulties of the *Philosophical Transactions* and its sibling *Proceedings* reveal the meaning and purpose of journals in a changing scientific community. At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history.

The Secure and the Dispossessed Nick Buxton, Ben Hayes, 2015-11-20

While the world's scientists and many of its inhabitants despair at the impact of climate change corporate and military leaders see nothing but opportunities. For them melting ice caps mean newly accessible fossil fuels borders to be secured from climate refugees social conflicts to be managed and more failed states in which to intervene. They are securing their assets at the expense of the planet and its inhabitants. *The Secure and the*

Dispossessed looks at these deadly approaches with a critical eye It also considers the flip side that the legitimacy of the elite is under unprecedented pressure from resistance by communities to resource grabs to those creating new ecological and socially just models for managing our energy food and water Topics covered include geoengineering militarism refugee protection greenwashing and the agricultural crisis among others Adaptation and resilience to a climate changed world is desperately needed but the form it will take will affect all of our futures

Overcoming Barriers to Deployment of Plug-in Electric Vehicles

National Research Council, Transportation Research Board, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Overcoming Barriers to Electric-Vehicle Deployment, 2015-06-26 In the past few years interest in plug in electric vehicles PEVs has grown Advances in battery and other technologies new federal standards for carbon dioxide emissions and fuel economy state zero emission vehicle requirements and the current administration s goal of putting millions of alternative fuel vehicles on the road have all highlighted PEVs as a transportation alternative Consumers are also beginning to recognize the advantages of PEVs over conventional vehicles such as lower operating costs smoother operation and better acceleration the ability to fuel up at home and zero tailpipe emissions when the vehicle operates solely on its battery There are however barriers to PEV deployment including the vehicle cost the short all electric driving range the long battery charging time uncertainties about battery life the few choices of vehicle models and the need for a charging infrastructure to support PEVs What should industry do to improve the performance of PEVs and make them more attractive to consumers At the request of Congress Overcoming Barriers to Deployment of Plug in Electric Vehicles identifies barriers to the introduction of electric vehicles and recommends ways to mitigate these barriers This report examines the characteristics and capabilities of electric vehicle technologies such as cost performance range safety and durability and assesses how these factors might create barriers to widespread deployment Overcoming Barriers to Deployment of Plug in Electric Vehicles provides an overview of the current status of

PEVs and makes recommendations to spur the industry and increase the attractiveness of this promising technology for consumers Through consideration of consumer behaviors tax incentives business models incentive programs and infrastructure needs this book studies the state of the industry and makes recommendations to further its development and acceptance Vibrio ecology, pathogenesis and evolution Rita R Colwell, Daniela Ceccarelli, 2014-10-24 Vibrios are Gram negative bacilli that occur naturally in marine estuarine and freshwater systems Some species include human and animal pathogens capable of causing gastroenteritis wound infections cholera and fatal septicemia Over the past decades cutting edge research on Vibrio genomics has promoted a tremendous advance in our knowledge of these pathogens Significant developments include the discovery of emerging epidemic clones tracking the spread of new strain variants and an intensified appreciation of the role of mobile genetic elements in antibiotic resistance spread as well as pathogenesis Furthermore improved understanding of the interaction of Vibrios with a variety of living organisms in the aquatic environment has documented the significant role of environmental reservoirs in their seasonal cycle favoring persistence of the pathogen during inter epidemic periods and enhancing disease transmission This Research Topic is dedicated to our current understanding in these areas and will bring together leading experts in the field to provide a deep overview of Vibrios ecology and evolution and will suggest the pathway of future research in this field **Breakout** Newt

Gingrich, 2013-11-04 It is not between the Left and the Right but between the past and the future America is on the edge of a breakout In fact we are poised for one of the most spectacular leaps in human well being in history Pioneers of the future innovators and entrepreneurs are achieving breakthroughs in medicine transportation energy education and other fields that will make the world a dramatically different and better place Unless the prison guards of the past stop them Every American must choose a side Will you be a champion of the future or a prisoner of the past Every potential breakthrough has to get past a host of individuals and institutions whose power and comfort depend on the status quo These prison guards of the past will strangle every innovation that threatens to change the way things have always been done if we let them

Technological Innovation in Legacy Sectors William B. Bonvillian, Charles Weiss, 2015-08-18 The American economy misses opportunities for innovation growth and job creation because of a neglected problem the resistance to innovation from Legacy sectors like energy manufacturing and health care which constitute most of our economy The book offers systematic strategies to overcome the structural obstacles to innovation in critically important Legacy sectors **Geophysics,**

Realism, and Industry Aitor Anduaga, 2015-12-17 Did industry and commerce affect the concepts values and epistemic foundations of different sciences If so how and to what extent This book suggests that the most significant influence of industry on science in the two case studies treated here had to do with the issue of realism Using wave propagation as the common thread this is the first book to simultaneously analyse the emergence of realist attitudes towards the entities of the ionosphere and of the earth's crust However what led physicists and engineers to adopt realist attitudes This book suggests

that a new kind of realism a realism of social and cultural origins is the answer a preliminary entity realism responding to specific commercial and engineering interests and a realism that was neither strictly instrumental nor exclusively operational The book has two parts while Part I focuses on the study of the ionosphere and how the British radio industry affected ionospheric physics Part II focuses on the study of the Earth s crust and how the American oil industry affected crustal seismology

The Source of All Things Reinhard Friedl,2025-08-22 In the tradition of Henry Marsh s Do No Harm Reinhard Friedl s The Source of All Things is a heart surgeon s personal investigation of the human heart moving from his riveting clinical experiences to a more poetic understanding of its workings The heart is our most important organ Yet despite that it has not changed since the appearance of Homo sapiens 300 000 years ago it is also our most mysterious In most human cultures it is seen as the source of love sympathy joy courage strength and wisdom What if the heart could answer questions neurosciences can t begin to Having witnessed the extraordinary complexity and unpredictability of human hearts in the operating theatre each one individual like a fingerprint heart surgeon Reinhard Friedl looked again at this primitive pump to reconcile it with his experiences from thousands of heart operations In this book he presents findings from various scientific disciplines such as secret connections of the heart and brain and their influence on emotions and consciousness He reveals the miracle that is the heart that we speak about so often yet is strangely foreign to many human beings Full of compelling patient stories The Source of All Things ends with a plea that we recognize the heart s wisdom and adopt a more heart centered way of living leading to greater health and more joy

The Soul of Genius Jeffrey Orens,2021-07-06 A prismatic look at the meeting of Marie Curie and Albert Einstein and the impact these two pillars of science had on the world of physics which was in turmoil In 1911 some of the greatest minds in science convened at the First Solvay Conference in Physics a meeting like no other Almost half of the attendees had won or would go on to win the Nobel Prize Over the course of those few days these minds began to realize that classical physics was about to give way to quantum theory a seismic shift in our history and how we understand not just our world but the universe At the center of this meeting were Marie Curie and a young Albert Einstein In the years preceding Curie had faced the death of her husband and soul mate Pierre She was on the

cusp of being awarded her second Nobel Prize but scandal erupted all around her when the French press revealed that she was having an affair with a fellow scientist Paul Langevin The subject of vicious misogynist and xenophobic attacks in the French press Curie found herself in a storm that threatened her scientific legacy Albert Einstein proved an supporter in her travails They had an instant connection at Solvay He was young and already showing flourishes of his enormous genius Curie had been responsible for one of the greatest discoveries in modern science radioactivity but still faced resistance and scorn Einstein recognized this grave injustice and their mutual admiration and respect borne out of this their first meeting would go on to serve them in their paths forward to making history Curie and Einstein come alive as the complex people they were in the pages of *The Soul of Genius* Utilizing never before seen correspondance and notes Jeffrey Orens reveals the human side of these brilliant scientists one who pushed boundaries and demanded equality in a man s world no matter the cost and the other who was destined to become synonymous with genius

Personnel Readiness referred to throughout this report as P R is responsible for the total force management of all
Department of Defense DoD components including the recruitment readiness and retention of personnel Its work and policies
are supported by a number of organizations both within DoD including the Defense Manpower Data Center DMDC and
externally including the federally funded research and development centers FFRDCs that work for DoD P R must be able to
answer questions for the Secretary of Defense such as how to recruit people with an aptitude for and interest in various
specialties and along particular career tracks and how to assess on an ongoing basis service members career satisfaction and
their ability to meet new challenges P R must also address larger scale questions such as how the current realignment of
forces to the Asia Pacific area and other regions will affect recruitment readiness and retention While DoD makes use of
large scale data and mathematical analysis in intelligence surveillance reconnaissance and elsewhere exploiting techniques
such as complex network analysis machine learning streaming social media analysis and anomaly detection these skills and

and the effect of greenhouse gas GHG emissions on global climate are driving interest in alternatives Transitions to
Alternative Vehicles and Fuels assesses the potential for reducing petroleum consumption and GHG emissions by 80 percent
across the U S LDV fleet by 2050 relative to 2005 This report examines the current capability and estimated future
performance and costs for each vehicle type and non petroleum based fuel technology as options that could significantly
contribute to these goals By analyzing scenarios that combine various fuel and vehicle pathways the report also identifies
barriers to implementation of these technologies and suggests policies to achieve the desired reductions Several scenarios
are promising but strong and effective policies such as research and development subsidies energy taxes or regulations will
be necessary to overcome barriers such as cost and consumer choice **Progress in Ceramic Science** J. E.
