 Bridgman Perkins,2017-08-16 Appraising cancer as a major medical market in the 2010s Wall Street investors placed their
 bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely
 publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that
 proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers
 staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market
 shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device
 industry throughout the twentieth century Academic engineers and physicians acquired financing to develop increasingly
 powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and
 freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization
 and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all
 too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and
 provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build

Increasing Productivity and Efficiency in Online Teaching Dickenson, Patricia, 2016-05-19 Distance learning has become very popular in recent years making evident some of the problems inherent to online classes as they are today High attrition rates driven in part by student isolation and low satisfaction have plagued online courses For an online class to succeed it must be built upon engaging media and meaningful interaction

Increasing Productivity and Efficiency in Online Teaching provides a reference for educators in virtual classrooms and enumerates strategies to foster instructor engagement and support. Because co-construction of information opposed to rote memorization of disseminated facts engages students and develops critical thinking skills, online education must shift to reflect this. Drawing from learning theory, this publication focuses on the ways educators can shape their online classes to best suit their students and leave them with knowledge and course satisfaction. This book is recommended for researchers, developers, students of education, administrators, and online educators in all subject areas.

Information Technology Based Methods for Health Behaviours Stephanie Champion, Carly Moores, Rebecca Golley, 2020-03-12. Understanding and modifying health behaviors plays an important part in healthcare. The need to change behaviors applies across a range of health contexts from individual interventions to the clinically delivered management of chronic diseases and rehabilitation. Telehealth or virtual care technology offers many possible advantages here including cost efficiency, scalability, personalization, and automated high volume data collection and analysis, but success will depend on the effectiveness of the design, implementation, and deployment of IT-based methods. This book, which forms part of the Global Telehealth series, includes papers presented at Global Telehealth 2019 GT2019, a National Symposium on the topic of IT-based Methods for Health Behaviours, held in Adelaide, Australia, on 5 July 2019. The 10 papers selected for inclusion here comprise only full paper, blind peer-reviewed contributions received for the symposium and the subsequent call for further contributions. Topics range from the scientific theory of health behavior change through technological approaches to active ageing and the implementation of the 10 000 steps project to a discussion of digital infrastructure for the storing/sharing of internet of things, wearables, and app-based research study data. The book will be of interest to all researchers, managers, and healthcare practitioners working to bring about positive changes in health behavior.

Black Girls Experiencing Their Intersectional Identities in School Crystal L. Edwards, 2019-10-17. Black Girls Experiencing Their Intersectional Identities in School explores the subjective experience of Black girls within the educational context. Based on interviews, diary entries, and focus groups, the author argues that as a result of their intersectional identities, Black girls experience unique challenges and obstacles in the educational setting. Addressing topics ranging from interpersonal relationships, social media, beauty, sexuality, hypervisibility, invisibility, and microaggressions, this book highlights the voices and experiences of Black girls between the ages of 11 and 15. The Girls provide a narrative account of the challenges they face daily in the educational context, describing in detail the factors that maintain and perpetuate volatile conditions. Additionally, this book explores the coping strategies that this group of Black girls developed to resist and respond to the daily obstacles. Ultimately, this book not only identifies the unique struggles faced by Black girls in schools as a result of their intersectional identities but, most importantly, this work explores pragmatic strategies that can be implemented to create safe and beneficial spaces for Black

Girls The author argues that through the implementation of Black Feminist Pedagogy an Ethic of Caring and partnerships with Black Girl Empowerment organizations educational practitioners can mediate the negative experiences and create spaces for growth
