Pidgin English Du Cameroun:

Sociolinguistic and Structural Aspects of Cameroon Creole English Aloysius Ngefac, 2016-08-17 Based on current data the book provides a detailed sociolinguistic and structural description of Cameroon Creole English with a special focus on aspects that are often used in creolistic literature as putative defining features of bona fide prototypical creoles It is the first comprehensive research monograph on the language that describes and situates its sociolinguistic and structural aspects within the context of current creolistic debate and answers the following unanswered questions How is the evolutionary trajectory of the language and which theory of pidgins and creoles genesis best accounts for its origin and development What is its current sociolinguistic status Is the language a pidgin or a creole What is the typological distance between the language and its main lexifier What is its relationship with the other West African contact languages and other creole languages In spite of the controversy that characterizes the field of creolistics regarding the defining characteristics of pidgins and creoles the book suggests for instance that if the different routes to creolization are recognized it will be much easier to come up with putative characteristics that define the developmental status of any contact language as is the case with Cameroon Creole English

from the interplay of languages and cultures in Africa Corpus Linguistics and African Englishes Alexandra U. Esimaje, Ulrike Gut, Bassey E. Antia, 2019-02-15 Corpus linguistics has become one of the most widely used methodologies across the different linguistic subdisciplines especially the study of world wide varieties of English uses corpus based investigations as one of the chief methodologies This volume comprises descriptions of the many new corpus initiatives both within and outside Africa that aim to compile various corpora of African Englishes Moreover it contains cutting edge corpus based research on African Englishes and the use of corpora in pedagogic contexts within African institutions This volume thus serves both as a practical introduction to corpus compilation Part I of the book corpus based research Part II and the application of corpora in language teaching Part III and is intended both for those researchers not yet familiar with corpus linguistics and as a reference work for all international researchers investigating the linguistic properties of African Englishes **Global Fragments** ,2007-01-01 While the world seems to be getting ever smaller and globalization has become the ubiquitous buzz word regionalism and fragmentation also abound This might be due to the fact that far from being the alleged production of cultural homogeneity the global is constantly re defined and altered through the local This tension pervading much of contemporary culture has an obvious special relevance for the new varieties of English and the literature published in English world wide Postcolonial literatures exist at the interface of English as a hegemonic medium and its many national regional and local competitors that transform it in the new English literatures Thus any exploration of a globalization of cultures has to take into account the fact that culture is a complex field characterized by hybridization plurality and difference But while global or transnational cultures may allow for a new cosmopolitanism that produces ever changing fluid identities they do not give rise to an egalitarian global village an asymmetry between centre and periphery remains largely intact albeit along new parameters The essays collected in this volume offer readings of literary theoretical and filmic texts from the postcolonial world These texts are read as attempts to articulate the global with the local from a perspective of immersion in the actual diversity of life worlds focusing on such issues as consumption identity politics and modes of affiliation In this sense they are global fragments locally refracted figurations of an experience of world wide interconnectedness *The Handbook of Bilingualism* Tej K. Aboh,Norval Smith,2009-12-17 In recent years there has been a new interest in evaluating complex structures in languages The implications of such studies are varied e g the distinction between supposedly more complex and less complex languages how complexity relates to human knowledge of language and the role of the reduction or increase of complexity in language change and creolization This book focuses on the latter issue but the conclusions presented here hold of typological complexity in general The chapters in this book show that the notion of complexity as conceived of in linguistics mainly centres on the outer manifestations of language e g numbers of affixes This exercise is useful in establishing the patterning of languages in terms of their degrees of analyticity or synthesis but it fails to address the properties of the inner rules of these grammars and how these relate to the computational system that governs the human language capacity Put simply issues of complexity should not be equated with the complexity observed in surface patterns of grammars alone
