SPECIAL PINTO PERFORMANCE TRAINING PROGRAM

INTRODUCTION
The purpose of this training program is to provide the technician with the necessary knowledge and skills to diagnose and repair the Pinto performance problems. This program is designed for the technician who is responsible for the maintenance and repair of the Pinto performance system.

Performance Problems
The most common performance problems on the Pinto are: poor acceleration, poor fuel economy, poor idle, and poor throttle response. These problems can be caused by a variety of factors, including: dirty air filter, dirty fuel filter, dirty carburetor, dirty spark plugs, and dirty distributor cap and rotor.

Diagnosis
The first step in diagnosing a performance problem is to check the basic maintenance items. If these items are in good condition, the next step is to check the carburetor, fuel filter, and spark plugs. If these items are also in good condition, the problem may be in the distributor or the engine timing.

Repair
If the basic maintenance items are in good condition and the problem is still present, the technician should check the carburetor, fuel filter, and spark plugs. If these items are also in good condition, the problem may be in the distributor or the engine timing.

Adjustment
If the problem is in the distributor or the engine timing, the technician should adjust the distributor and the engine timing. The distributor should be adjusted so that the points are in good contact with the distributor cap. The engine timing should be adjusted so that the timing mark is in the correct position.

Testing
After the repairs have been made, the technician should test the engine to see if the problem has been resolved. The test should be done at idle, at 1000 RPM, and at 2000 RPM. The engine should be tested for at least 10 minutes at each speed.

Conclusion
The Pinto performance training program is designed to provide the technician with the necessary knowledge and skills to diagnose and repair the Pinto performance problems. This program is a valuable tool for the technician who is responsible for the maintenance and repair of the Pinto performance system.
