Rebooting Pedagogy and Education systems for the Twenty-first Century: Why we need course-corrections immediately Sujay Rao Mandavilli, 2024-04-09 Education is the fundamental pillar upon which any human civilization rests As a matter of fact no civilization in any meaningful form or degree has been possible in human history that has not been built on the bulwark and edifice of education While literacy may have been limited to the privileged few in early ancient civilizations it was these privileged few who controlled the masses and set the tempo for meaningful progress in such civilizations educational systems have proven to be the bedrock and foundational pillar upon which much of human accomplishment and achievement have rested too In spite of the naysayers the cynics and the pessimists education has expanded greatly in the twentieth century while the world's earliest civilizations were not western in the canonical sense of the term there is no denying that western civilizations have pulled away strongly since then Riding on the shoulders on ancient Greece western intellectualism has been the bulwark upon which the superstructure of modern civilization has been built Even as recently as the middle of the twentieth century the rest of the world as opposed to the west had a lot of catching up to do Thankfully and mercifully a lot has changed since then India in the 1950s and 1960s emphasized higher education but neglected universal primary education as evidenced by low primary school enrollments and a high rate of dropouts Since then programs and schemes such as the Sarva Siksha Abhiyan or education for all programs have increased primary school enrollment considerably India now comfortably stands on the threshold of universal adult literacy While the quantity of education has been augmented quality has often failed to keep pace The tenets and the essential doctrines forming a part and parcel of the foundational pillars of pedagogy and education are antiquated and are still steeped in the

western experience What is worse is that is very little awareness on the issue of the need for change this must be the foundation of all meaningful change but alas that foundation has yet to be built In this book we draw upon our long list of papers on the social science particularly anthropological pedagogy and the sociology of science and propose the direction we believe pedagogy must take in the twenty first century This can be no one man army we invite other scholars to contribute in eminent measure We also believe that this i e a foundational assessment of the concepts of pedagogy must become one of the more important and vital movements of the twenty first century This work is also at the heart of our globalization of science movement as many if not most concepts in various fields of the social science are based on old and archaic western centric paradigms There is also an unnatural gap between various fields of social sciences and the non social sciences too just as careerism is rampant across disciplines and what we called institutional coherentism is lacking Scientists say however recent research has shown that Does that mean that old research was wrong Why was it wrong Was it due to the absence of data or was it methodological error Why do we go round and round without a meaningful long term direction Very little scholarship is driven by the absolute desire to do good to society As Thomas Paine once famously stated A body of men holding themselves accountable to nobody ought not to be trusted by anybody We have theories theories and only theories all driven by old fashioned careerism or academic rivalry and with limited explanatory power All this needs to change in the twenty first century and practical application of knowledge emphasized To quote C S Lewis Experience that most brutal of teachers But you learn my God do you learn Anand Mahindra and several other individuals have repeatedly called for a new world class education system in India and elsewhere but there is very little conceptual clarity on how we should go about creating one Let a million scholars bloom Let a million intellectuals bloom Let a million scientists social scientists included bloom in different parts of the world all in the twenty first century Why should we hold our tongue and suffer in silence Let intellectuals drive meaningful and productive change Let better education systems form the backbone of better societies Let there be a healthy rivalry among nations to develop better and better education systems There is no need for only western nations to take the lead here Those who have better ideas can indeed leapfrog everyone else Those who think better and do better win

Supranational Citizenship and the Challenge of Diversity Francesca Strumia, 2013-09-05 In Supranational Citizenship and the Challenge of Diversity Francesca Strumia explores the potential of European citizenship as a legal construct and as a marker of group boundaries for filtering internal and external diversities in the European Union Adopting comparative federalism methodology and drawing on insights from the international relations literature on the diffusion of norms the author questions the impact of European citizenship on insider outsider divides in the EU as experienced by immigrants set by member states and perceived by native citizens The book proposes a novel argument about supranational citizenship as mutual recognition of belonging This argument has important implications for the constitution of insider outsider divides and for the reconciliation of multiple levels of diversity in the EU

The Mentality of Partisans of the Polish

Anti-Communist Underground 1944-1956 Mariusz Mazur,2022-10-30 This book is the first study of the mentality of anti Communist underground fighters and presents especially their thinking ideals stereotypes and customs The models and psychological processes that the volume analyses are relevant not only to the Polish partisans but also to members of other underground organisations in East Central Europe South America and Asia It explores how the underground organizations were created who joined them and why what thoughts and emotions were involved and what were the consequences of the decisions to join them Experiences and situations are illustrated with excerpts of diaries and memoirs which reveal the thinking of people in extreme situations when their lives are in danger when they are caught in desperate conflicts or are fighting against overwhelming government forces The Mentality of Partisans is useful for upper level undergraduates postgraduates and scholars interested in the history of Europe resistance movements anticommunism military and political conflicts World War Two and non classical historiography

Weaponized Words Kurt Braddock,2020-04-16 Strengthen your understanding of the persuasive mechanisms used by terrorist groups and how they are effective in order to defeat them Weaponized Words applies existing theories of persuasion to domains unique to this digital era such as social media YouTube websites and message boards to name but a few Terrorists deploy a range of communication methods and harness reliable communication theories to create strategic messages that persuade peaceful individuals to join their groups and engage in violence While explaining how they accomplish this the book lays out a blueprint for developing counter messages perfectly designed to conquer such violent extremism and terrorism Using this basis in persuasion theory a socio scientific approach is generated to fight terrorist propaganda and the damage it causes

Peace, Politics, and Religion Jeffrey Haynes,2020-12-14 Relationships between peace politics and religion are often controversial and sometimes problematic Religion is a core source of identity for billions of people around the world and it is hardly surprising that sometimes it becomes involved in conflicts At the same time we can see religion involved not only in conflict It is also central to conflict resolution peace making and peacebuilding Religious involvement is often necessary to try to end hatred and differences frequently central to political conflicts especially but not only in the Global South Evidence shows that religious leaders and faith based organisations can play constructive roles in helping to end violence and in some cases build peace via early warnings of conflict good offices once conflict has erupted as well as advocacy mediation and reconciliation The chapters of this book highlight that religion can encourage both conflict and peace through the activities of people individually and collectively imbued with religious ideas and ideals

Ghost Citizens Lukasz Krzyzanowski,2020-06-16 The poignant story of Holocaust survivors who returned to their hometown in Poland and tried to pick up the pieces of a shattered world In the immediate aftermath of World War II the lives of Polish Jews were marked by violence and emigration But some of those who had survived the Nazi genocide returned to their hometowns and tried to start their lives anew Lukasz Krzyzanowski recounts the story of this largely forgotten group of Holocaust survivors Focusing on Radom an industrial city about sixty

miles south of Warsaw he tells the story of what happened throughout provincial Poland as returnees faced new struggles along with massive political social and legal change Non Jewish locals mostly viewed the survivors with contempt and hostility Many Jews left immediately escaping anti Semitic violence inflicted by new communist authorities and ordinary Poles Those who stayed created a small isolated community Amid the devastation of Poland recurring violence and bureaucratic hurdles they tried to start over They attempted to rebuild local Jewish life recover their homes and workplaces and reclaim property appropriated by non Jewish Poles or the state At times they turned on their own Krzyzanowski recounts stories of Jewish gangs bent on depriving returnees of their prewar possessions and of survivors shunned for their wartime conduct The experiences of returning Jews provide important insights into the dynamics of post genocide recovery Drawing on a rare collection of documents including the postwar Radom Jewish Committee records which were discovered by the secret police in 1974 Ghost Citizens is the moving story of Holocaust survivors and their struggle to restore their lives in a place that was no longer home

In Defence of Religious Schools and Colleges Elmer John Thiessen,2001 It is often argued that religious schools and colleges promote intolerance divisiveness and fanaticism and that they violate the principle of academic freedom Some writers also suggest that economic support for religious schools by the state violates the principle of the separation of church and state Elmer Thiessen provides a philosophical defence of religious schools and colleges against these and other standard objections He concludes with a radical proposal a pluralistic educational system will better prepare students for citizenship in pluralist liberal democracies than a monopolistic state maintained school system In placing his argument within the context of liberal democratic values Thiessen gives concrete examples of objections to religious schools and offers practical suggestions that follow from the philosophical treatment of the problem In Defence of Religious Schools and Colleges bridges the gap between philosophical argument and educational practice It will be of interest not only to philosophers and educational theorists but also to practitioners in education Academics policy makers political theorists lay people teachers administrators and parents those who object to religious schools and colleges and those who find themselves trying to answer the objections will benefit from reading this book

Ministerial Ethics in the 21st Century Antwon C. Lewis PhD, 2019-02-23 What are Christian ethics A Christian's ethics should originate within the boundaries of Christianity and likewise the sole basis for ethical practices and behaviors should be built upon the theological threshold of God the Lordship of Christ his Son and the hope of glory in habituating the new kingdom Ministerial Ethics in the 21st Century answers fundamental questions about Christian ethics explaining what it means to be ethical in ministry Author Antwon C Lewis also helps us understand what constitutes a healthy character and what role discernment plays in various ethical situations Christian leaders will especially benefit from this study as they can have their moral principles be influenced by scriptural standards and not determine right or wrong based on their own value system A crisis in today's society does indeed exist and our present world is challenged with a need for ministerial ethics Therefore thorough research and investigation are needed and Ministerial Ethics in the 21st Century will help ameliorate continued hypocrisy and poor ministerial integrity in the church

Why we need a revolution in the Social sciences: A post-colonial perspective Sujay Rao Mandavilli, 2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children's day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990's even the mid 1980's when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question's own religious linguistic and nationalistic affiliation and loyalties Therefore the

age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors
