

Recording Selector

Permits choose any input connected to the unit and feed it directly to the TAPE 1 and TAPE 2 outputs on the back of the unit for recording the selected input. However, note the TAPE 1 input can be recorded by the TAPE 2 output, but the TAPE 2 input cannot be recorded by the TAPE 1 output. It is possible to record one source, e.g., CD or TUNER, while listening to a different source such as PHONO or AUX. When not recording, ensure to set the selector at the center OFF position to cut off the circuit completely from the signal path.

Listening Selector

Allows choose any input connected to the unit. The selector operates independently from the Recording selector above, so you can listen to one source while recording another different source.

WORDS ON OPERATIONS

Precautions

1. Before commencing operation, check to see if all connections are properly made.
2. Always ensure to set the Volume control to the minimum position before turning on the Power switch.
3. Make sure the Recording selector is at the OFF position when listening to any source and not recording.

Playing Turntable

1. Set to the PHONO position on the Listening selector.
2. Use only a high quality cartridge to obtain the maximum potential from the unit's high quality phono circuit.
3. Using an MC cartridge with an extremely low sensitivity way below the specified value on the SPECIFICATIONS table at the last section of this manual may create problems. Try avoid use such cartridge, as there are many as good ones with the normal output sensitivities.

CONNECTING COMPONENTS

4. Usually using cartridges as recommended by your dealers will prevent any grief on the suitable matching.

Tuner Reception

1. Set to the TUNER position on the Listening selector.
2. If possible, turn your tuner's power off when not operating it. Although crosstalks are held to minimum by the circuit design, this is the perfect way to cut off the signal from the radio reception bleeding through to the other inputs connected to the main unit.
3. A Rotel tuner is recommended for the optimum matching in sound quality.

Operating CD Player

1. Set to the CD position on the Listening selector.
2. Read the instruction manual of your player carefully to maximize the full potential.
3. Using higher quality interconnecting cords between your CD player and the amplifier may often improve sound quality.

Tape Deck Playback

1. Set to the TAPE 1 or TAPE 2 position on the Listening selector depending on which input your tape deck is connected.
2. Use only a good quality cassette tape deck (in terms of sound quality) or a DAT deck, etc. for maximizing the full potential of the amplifier.
3. Using higher quality interconnecting cords between your tape deck and the amplifier may often improve sound quality.
