Routledge Handbook of Water Economics and Institutions Kimberly Burnett, Richard Howitt, James A. Roumasset, Christopher A. Wada, 2014-12-05 Growing scarcity of freshwater worldwide brings to light the need for sound water resource modeling and policy analysis While a solid foundation has been established for many specific water management problems combining those methods and principles in a unified framework remains an ongoing challenge This Handbook aims to expand the scope of efficient water use to include allocation of sources and quantities across uses and time as well as integrating demand management with supply side substitutes Socially efficient water use does not generally coincide with private decisions in the real world however Examples of mechanisms designed to incentivize efficient behavior are drawn from agricultural water use municipal water regulation and externalities linked to water resources Water management is further complicated when information is costly and or imperfect Standard optimization frameworks are extended to allow for coordination costs games and cooperation and risk allocation When operating efficiently water markets are often viewed as a desirable means of allocation because a market price incentivizes users to move resources from low to high value activities However early attempts at water trading have run into many obstacles Case studies from the United States Australia Europe and Canada highlight the successes and remaining challenges of establishing efficient water markets

Routledge Handbook of Water Law and Policy Alistair Rieu-Clarke, Andrew Allan, Sarah Hendry, 2017-02-24 Water plays a key role in addressing the most pressing global challenges of our time including climate change adaptation food and energy security environmental sustainability and the promotion of peace and stability This comprehensive handbook explores the pivotal place of law and policy in efforts to ensure that water enables positive responses to these challenges and provides a basis for sound governance The book reveals that significant progress has been made in recent decades to strengthen the governance of water resource management at different scales including helping to address international and sub national conflicts over transboundary water resources It demonstrates that effective laws and policies are fundamental drivers for the safe equitable and sustainable utilization of water However it is also shown that what might constitute an effective law or policy related to water resources management is still hotly debated As such the handbook provides an important and definitive reference text for all studying water governance and management

The Routledge Handbook of Sustainable Cities and Landscapes in the Pacific Rim Yizhao Yang, Anne Taufen, 2022-03-16 This handbook addresses a growing list of challenges faced by regions and cities in the Pacific Rim drawing connections around the what why and how questions that are fundamental to sustainable development policies and planning practices These include the connection between cities and surrounding landscapes across different boundaries and scales the persistence of environmental and development inequities and the growing impacts of global climate change including how physical conditions and social implications are being anticipated and addressed Building upon localized knowledge and contextualized experiences this edited collection brings

attention to place based approaches across the Pacific Rim and makes an important contribution to the scholarly and practical understanding of sustainable urban development models that have mostly emerged out of the Western experiences. Nine sections each grounded in research dialogue and collaboration with practical examples and analysis focus on a theme or dimension that carries critical impacts on a holistic vision of city landscape development such as resilient communities, ecosystem services and biodiversity, energy, water, health and planning and engagement. This international edited collection will appeal to academics and students engaged in research involving landscape architecture, architecture, planning, public policy, law, urban studies, geography, environmental science and area studies. It also informs policy makers, professionals and advocates of actionable knowledge and adoptable ideas by connecting those issues with the Sustainable Development Goals (SDGs) of the United Nations. The collection of writings presented in this book speaks to multiyear collaboration of scholars through the APRU Sustainable Cities and Landscapes (SCL) Program and its global network facilitated by SCL Annual Conferences and involving more than 100 contributors from more than 30 institutions. The Open Access version of chapters 1, 2, 4, 11, 17, 23, 30, 37, 42, 49 and 56 of this book is available at <http://www.taylorfrancis.com/books/e/9781003033530> and have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license. **The Routledge**

Handbook of Critical Resource Geography Matthew Himley, Elizabeth Havice, Gabriela Valdivia, 2021-07-12. This Handbook provides an essential guide to the study of resources and their role in socio environmental change. With original contributions from more than 60 authors with expertise in a wide range of resource types and world regions, it offers a toolkit of conceptual and methodological approaches for documenting, analyzing and reimagining resources and the worlds with which they are entangled. The volume has an introduction and four thematic sections. The introductory chapter outlines key trajectories for thinking critically with and about resources. Chapters in Section I: Unknowing resources offer distinct epistemological entry points and approaches for studying resources. Chapters in Section II: Unknowing resource systems examine the components and logics of the capitalist systems through which resources are made, circulated, consumed and disposed of, while chapters in Section III: Doing critical resource geography. Methods, advocacy and teaching focus on the practices of critical resource scholarship exploring the opportunities and challenges of carrying out engaged forms of research and pedagogy. Chapters in Section IV: Resource making, world making use case studies to illustrate how things are made into resources and how these processes of resource making transform socio environmental life. This vibrant and diverse critical resource scholarship provides an indispensable reference point for researchers, students and practitioners interested in understanding how resources matter to the world and to the systems, conflicts and debates that make and remake it.

The Economics of Water Georg Meran, Markus Siehl, Christian von Hirschhausen, 2020-09-04. This open access textbook provides a concise introduction to economic approaches and mathematical methods for the study of water allocation and distribution problems. Written in an accessible and straightforward style, it discusses and analyzes central issues in

integrated water resource management water tariffs water markets and transboundary water management By illustrating the interplay between the hydrological cycle and the rules and institutions that govern today's water allocation policies the authors develop a modern perspective on water management Moreover the book presents an in depth assessment of the political and ethical dimensions of water management and its institutional embeddedness by discussing distribution issues and issues of the enforceability of human rights in managing water resources Given its scope the book will appeal to advanced undergraduate and graduate students of economics and engineering as well as practitioners in the water sector seeking a deeper understanding of economic approaches to the study of water management

,2025-01-10 The impacts of population growth climate change and water scarcity and variability on a country s economy or society in addition to the sheer need to harness international rivers for domestic and regional purposes have made the management of transboundary freshwater a subject of great import Over the past several decades research in various disciplines utilizing a variety of methodologies has explored these issues focusing on freshwater s strategic importance as well as conflict cooperation and negotiation over shared water bodies rivers lakes aquifers This multi volume set seeks to contribute to this still burgeoning body of literature by focusing on several key themes that can help explain and recognize successes and failures in transboundary freshwater management In particular the set seeks to bring together original scholarship focusing on international law technology institutions formal and informal and the interplay of domestic and international affairs Each edited volume in the set aims to build on extant research while also fostering new paths of inquiry Overall the set seeks to become a guide for both academics and practitioners hoping to better understand the joint management of this precious natural resource from socio political legal economic and technological perspectives Volume 1 explores international law for shared freshwater resources both surface and subsurface waters from a multidisciplinary perspective It explains the role of international water law IWL and or specific norms within particular contexts case studies and critically examines that role and its relative success or failure in achieving the intended objectives Volume 2 explores the roles of and limitations of technologies and their applications in the management of transboundary water and wastewater It presents case studies and legal and political analyses that focus on the potential or actual roles and implications of the technologies in transboundary policy and management rather than detailed explications of the technologies themselves Volume 3 contributes to the growing literature seeking to understand how when and if institutions broadly defined impact states abilities to address their joint water disputes The volume presents a combination of single comparative and empirical analyses of cases across the world about the role of institutions in facilitating collaboration over transboundary water resources and mitigating conflict Volume 4 seeks to make sense of the interplay of domestic transnational and international dynamics in explaining conflict and cooperation over water through single or comparative case studies as well as analyses of on the ground transboundary water management experiences arising from these complex political dimensions

Netherlands Yearbook of International Law 2020 Maarten den Heijer, Harmen van der Wilt, 2022-08-26 This volume of the Netherlands Yearbook of International Law NYIL addresses the question how the assumption that states have a common obligation to achieve a collective public good can be reconciled with the fact that the 195 states of today's world are highly diverse and increasingly unequal in terms of size population politics economy culture climate and historical development The idea of common but differentiated responsibilities is on paper the perfect bridge between the factual inequality and formal equality of states The acknowledgement that states can have common but still different more or less onerous obligations is predicated on the moral and legal concept of global solidarity This book encompasses general contributions on the function and the content of the related principles chapters that describe and evaluate how the principles work in a specific area of international law and chapters that address their efficiency and broader ramifications in terms of compliance free rider behaviour and shifting balances of power The originality of the book resides in the integration of conceptual comparative and practical dimensions of the principles of global solidarity and common but differentiated responsibilities The book is therefore highly recommended reading for both academics with a theoretical interest and those working within international organisations The Netherlands Yearbook of International Law was first published in 1970 It offers a forum for the publication of scholarly articles in a varying thematic area of public international law
