

Rubric for Effective Teacher Technology Use (Organized by the Four Domains of Danielson's Framework for Teaching¹)

Domain 1: Planning and Preparation

Technology-related competencies in this domain:

	Basic	Proficient	Distinguished
1. The teacher uses online resources, including professional social networking sites, to stay current on the latest research and best practices in his or her field.	The teacher reviews information online, discusses it with colleagues, but practice is minimally affected.	The teacher interacts in online networks with professionals. Teaching reflects what has been learned from those interactions.	The teacher creates and shares innovative content and teaching practices with other professionals online.
2. The teacher is aware of the characteristics of "net generation" learners and their relationship with technology and uses this information to design engaging activities.	The teacher uses technology to present information in a one-to-many learning environment.	The teacher uses technologies to offer students a variety of resources to learn and solve problems.	The teacher asks students to use technology resources of their choosing to learn and solve problems every day in class.
3. The teacher determines the technology skill level of students, knows the expected competencies for productivity and research, and finds means of remediation of individual students when needed.	The teacher knows individual skill levels, but moves on according to predetermined lesson plans.	The teacher has appropriate expectations of students based on their technology skill levels. Creates separate predetermined pathways for low and high skilled students.	The teacher uses formative assessments to gauge student skill development and provides flexible pathways, including student choice, for all learners.
