HEADING

It's Morphing Time: Power Rangers and a New Media Landscape

TITLE

INTRO

While some teenagers have to deal with zits, math tests, and asking a crush to prom, others wear colored bodysuits and perform martial arts against strange, extra-dimensional evil. Premiering in the U.S. in the early 90s, *Power Rangers* presented a weird, new form of entertainment, introducing children to martial arts and Japanese culture in the trappings of Saturday morning programming and the after-school special. Despite its often fantastical leanings, *Power Rangers* presented an integral turning point in children's programming and media at large.

Although it presented something new and largely unseen by Western audiences, *Power Rangers* was anything but. All of the action scenes were taken directly from Japan's *Super Sentai* series (specifically *Kyoryu Sentai Zyuranger*), intercut with scenes of an American cast existing within tranquil Angel Grove. The *Super Sentai* series stayed within the traditions of the long-running line of programming known as tokusatsu, meaning "special effects" (a reference to the use of practical special effects).

Transplanting Japanese cultural media and overlaying it upon an American production and audience posed its own challenges, but the almost immediate success came from its own storytelling. At first blush, winding fantastical adventures and impressive martial arts into the everyday lives of American teens (who dealt with bullying, teamwork, and celebrating birthdays) seems disparate. However, the combination led to instantly relatable stories that resonated with children, imparting ideas of community and selflessness through skills and talents of all forms, physical, mental, and emotional.

In conclusion, *Power Rangers* presented an amalgam of different cultural ideas to create a new children's media landscape. The original series has since given rise to ongoing series, along with offshoot books, comics, and other media. For many kids, the show was an introduction to new ideas that were still grounded within the parks, schools, and suburbs of their lives. It was a form of escapism and imagination that stayed within the bounds of a reality that could be cruel, difficult to understand, or full of light. It just took some friends, some martial arts, and the ability to morph into something new.

Choosing Students Wayne Camara, Ernest W. Kimmel, 2005-03-23 This volume brings a variety of perspectives to bear on the issue of how higher education institutions can or should choose students during the early part of the 21st century Many of the contributors report on research to develop and validate potential tools to assist those responsible for admission decisions Other contributors however pose broader questions about the nature of selective admissions about institutional responses to the changing demography of those seeking to enter higher education or about the appropriate criteria of success in higher education The volume is particularly timely because the question of how changes in admission tools and processes will affect campus diversity following the recent Supreme Court decision concerning the University of Michigan Diversity is an important concern of all of the contributors and the chapter by Lee Bollinger President at Michigan at the time the court cases were filed is particularly relevant This book brings together the research that underlies a variety of proposed

approaches to improving the selection of students Providing support for the integrity of the admissions process and the validity of new tools to help a higher education institution to select a diverse student body this book explores the implications of the assessment component of K 12 school reform for higher education admissions practices The diverse contributions to this volume reflect the current ferment in educational research and educational practice as institutions of higher education seek to develop a new admissions paradigm for coming decades following the University of Michigan decisions This book is intended for those leaders and professionals who set admission policies and practices in American colleges and graduate and professional schools as well as for those scholars and scientists who research develop and validate tools for use in the process of choosing students in ways that are congruent with an institution s mission values and goals *Genre in the Classroom* Ann M. Arab Students' Writing in English at the College Level Ruwaida Abu Rass, 2024-12-02 This book contains detailed theoretical information as well as practical strategies, techniques and pedagogical tips. It also includes analysis to the problems and challenges that face ESL/EFL students in general and Arab learners in specific. The book could be of interest not only to EFL researchers in academic writing, writing instructors, EFL educators at the college level, policymakers and undergraduate and graduate students but also for any second or foreign language teachers.

A Program Development Handbook for the Holistic Assessment of Writing Norbert Elliot, Maximino Plata, Paul F. Zelhart, 1990 This book is a major breakthrough for developers of writing assessment programs who must certify the writing competency of undergraduate students. Legislators and accreditation boards across the nation have called for and implemented large scale projects to measure educational outcomes. This single source provides comprehensive information on the history, underlying concepts and process of conducting a large scale writing assessment program at a specific institution of higher education. The handbook opens with an analysis of the rationale for the assessment of writing during the junior year of the undergraduate curriculum. The authors then turn to a case study of the success of their own institutional wide assessment program. A history is provided of 20th century writing assessment practices as well; attention is given to defining levels of literacy. After describing an assessment process model, discussion turns to the design of questions, the administration of the assessment, the rating of papers and the statistical analysis of data. Attention is also given to the design of a course for those who are unsuccessful on the assessment. The study closes with directions for further research and over 200 references in the bibliography.
