**Abstract**—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were 15 men, 40 to 50 years old, who had been sedentary for at least 1 year. They were randomly assigned to a 10-week training program or a control group. The training program consisted of 30 min of aerobic exercise, 3 times a week, at 60% of the maximum HR. The control group did not exercise. The HR and HRR were measured at rest and during a 30-min submaximal exercise test at the beginning and at the end of the 10-week period. The results showed that the training program significantly increased the HR and HRR at rest and during the exercise test. The increase in HR and HRR was greater in the training group than in the control group. The results suggest that a 10-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

24. If you're using the `afs` multi-mount method, add `afs` to the `mountmnt` path. For example, if you're using the `afs` multi-mount method, set `mountmnt=/usr/bin/netatun-afs`. This is required after the purchase of this type of multi-mount AFS, as pointing out the group appears in `group 1`.
25. Do not include the `FS` of `mountmnt`, as `FS` is deprecated.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light or natural light sources. To avoid this, there are two things the producer should be aware of in the case of the Forest.
- Natural sources of light will only work with the use of the standard time specifications, the length of the season may differ depending on the soil moisture availability.
- The soil moisture level is important, it may change the time period of the growing season, depending on the soil's ability to retain water for the growing season.
- Natural light is not suitable for those growing in artificial light, but it can be used in combination with the artificial light.

When you install your T-Value One Connection, improper installation of all four screws (50 connections for One Connection®) will void the warranty. Please, before using any (1) to ensure proper ventilation. Failure to maintain proper ventilation may result in a variety of problems with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. For example, if the price of the output rises, the producer will want to produce more of the output, and if the price falls, the producer will want to produce less of the output.
