The HPBM is organized into six complementary parts starting with an introductory section. The book then provides in-depth coverage of content issues, applications, and implementation, general specific chapters, technology-related questions involved in the behavioral management of NHPs, and a concluding section. Primate behavioral management is a topic that has recently generated a considerable number of primary publications in the scientific literature, mostly with an applied focus. Similarly, there are many primary publications currently available that address more basic issues related to the understanding of primate behavior. One of the principal goals of the HPBM is to highlight and synthesize basic science advances that can be adapted and applied to enhance the behavioral management of captive NHPs.

Diego Maradona Pablo Brescia, Mariano Paz, 2022-12-01. This is the first book in English to closely examine the life of Diego Maradona from socio-cultural perspectives, exploring how his status as an icon, a popular sporting hero, and a political figurehead has been culturally constructed, reproduced, and manipulated. The volume looks at representations of Maradona across a wide variety of media, including literature, cinema, popular music, printed and online press, and radio, and in different countries around the world, to cast new light on topics such as the instrumentality of sporting heroes and the links among sport, nationalism, and ideology. It shows how the life of Maradona, from his origins in the *barrio* through to his rise to god-like status in Naples and as a postcolonial symbol of courage and resistance against imperial powers across the global south, alongside scandal and his fall from grace, powerfully illustrates themes such as the dynamics of gender, justice, and affect that underpin the study of sport, culture, and society. This is essential reading for anybody with an interest in football, sport studies, media studies, cultural studies, or sociology.
