Sports Crazy Steven J. Overman, 2019-02-11 Sports Crazy How Sports Are Sabotaging American Schools exposes the excesses of middle and high school sports and the detrimental effects our sports obsession has on American education Institutions are increasingly emulating college and professional sports models and losing sight of a host of educational and health goals Steven J Overman describes how this agenda is driven largely by partisan fans and parents of athletes who exert an inordinate influence on school priorities and he explains how and why school administrators shockingly and consistently capitulate to these demands The author underscores the incongruity of public schools involved in an entertainment business and the effects this diversion has on academic integrity learning life experience and overall educational outcomes Overman examines out of control school sports within the context of a school's educational mission and curriculum with telling reference to impacts on physical education He explores as well the outsized place of interscholastic sports beyond the classroom and scrutinizes the distorted relationship between intramural or recreational sports and elitist varsity athletics Overman's chapter on tackle football explains many reasons why this sport should be eliminated from the school extracurriculum and replaced by flag or touch football Overman presents a brief history of interscholastic sports and he compares and contrasts the American experience of school sponsored sport to the European model of community based clubs Which approach better serves students Overman recommends reforms in the context of a radical proposal to phase out interscholastic sports in favor of an intramural or club model This approach would alleviate such problems as elitism and gender bias and reign in hypercompetitiveness while freeing schools to educate students rather than provide public entertainment

Tackle Football and Traumatic Brain Injuries Daniel S. Goldberg, 2024-10-22. A timely look at the ethical, legal and policy issues surrounding brain injury and collision sports. American tackle football is an industry like any other. And like many industries, it sells a product that is dangerous to those who use it or, in this case, those who play it. In *Tackle Football and Traumatic Brain Injuries*, Daniel S. Goldberg explores the connections among traumatic brain injury, collision sports, and the industry's continuing efforts to manufacture doubt. Focusing especially on youths and adolescents, the most vulnerable population that comprises over 99% of tackle football players in the US, Goldberg addresses the ethical and social implications of their participation in tackle football. Goldberg discusses the true scope of the danger and the costs to society and individuals of caring for injured participants. If these risks were to become widespread public knowledge, the profitability and perhaps even the viability of American football would be at risk. As the tackle football industry has consistently worked to mask the health hazards involved in playing football, it has used a particular tool that has proved highly effective in achieving this subterfuge: the manufacture of doubt. Goldberg advocates for using public health laws as a tool for countering these efforts at obfuscation and he outlines specific policy proposals intended to address the population health and ethical problems presented by tackle football. The book draws on public health ethics, public health law, and the histories of occupational and public health to assess the limits of parental choice to expose their children to risks of injury. Should kids play tackle football at all, and who decides if they should? Goldberg offers practical answers to these critical legal, ethical, and social questions. Chris Nowinski, former Harvard football player and WWE wrestler, provides a timely and insider's perspective on these critical issues in the foreword.
