A Better Future

Jacqueline Bhabha, Wenona Giles, Faraaz Mahomed, 2020-09-17 Policy makers advocates and scholars have long concentrated on the importance of equal access to primary and secondary education as a foundation for a democratic and just society Despite the growing importance of higher and specialist education in an increasingly technological and skill focused global market tertiary education has attracted much less attention And yet universities and colleges are epicentres of egregious disparities in access which impinge on traditionally marginalized communities such as racial minorities migrants indigenous populations and people with disabilities By drawing attention to this issue and assembling first rate material from scholars and policy makers across the globe this book performs an invaluable service for those interested in understanding and fighting a highly significant violation of educational opportunity and social justice

Breaking a Rainbow, Building a Nation

revolution **Achieving Nelson Mandela University?** Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past. A significant State-driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities. But just over two decades later, for a variety of reasons, the higher education sector in South Africa appears beset with numerous challenges. Nelson Mandela University is one of the public universities that emerged from the restructuring process. The university is in an ongoing state of evolution, becoming what it developed out of: the amalgamation of the University of Port Elizabeth, Port Elizabeth Technikon, and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005. In 2017, it was renamed Nelson Mandela University after the world-renowned statesman rather than the metropolitan area in which the university is primarily located. The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society, striving to be the academic expression of the values and ethos of its iconic namesake. Endeavouring to be something greater and different from the norm, it imbues its strategy, public statements, and practices. The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar. A cross-section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution. While Nelson Mandela University has performed the usual work expected of any university, it has also sought to turn the university outwards to achieve a higher purpose, framing itself as a values-based university on a journey to become something else. In *Achieving Nelson Mandela University*, the university attempts to give an account of itself. The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go.

Apartheid and Fragmented Protest in Contemporary Southern Africa Cuthbert Tagwirei, 2025-09-26 *Apartheid and Fragmented Protest in Contemporary Southern Africa* examines protest movements through the lens of Apartheid Studies, the first general theory of apartheid which explores how oppression, harm, injustice, poverty, loss, and inequality persist. The book argues that apartheid, which breaks the world of the oppressed into fragments, fomenting diverse experiences of oppression among its victims, frames the nature and course of protests by making them subject to its fragmentation. Protest is thus redefined as good neighbourly and demoted on account of its symbiotic relationship to apartheid. It is observed that the proliferation of protests does not preclude the persistence of apartheid. Rather, protest and apartheid are seen to be compatible. By examining protest hashtags on X from South Africa and Zimbabwe, the book explores and identifies the forms, relations, meanings, trajectories, and effects protests take, evoke, and embody as fragments subsisting in a fractured apartheid universe. It demonstrates how and why life goes on amidst protest, sheds light on the contradictions, paradoxes, and complexities that characterise protest movements, and invites conversations around protest as a paradigm in the context of apartheid. The book will be of interest to researchers

across the fields of social movements protests sociology African Studies and communication and media studies *Lifestyle and Epidemiology* Kotsedi Daniel Monyeki, Han C.G. Kemper, 2021-10-06 *Lifestyle and Epidemiology* The Double Burden of Poverty and Cardiovascular Diseases in African Populations examines the profile of non communicable diseases NCDs in the rural South African population The burden of diseases in South Africa is characterized by a combination of poverty related diseases with emerging NCDs associated with urbanization industrialization and a Westernised lifestyle Chapters in this book examine the effects of poverty COVID 19 and other social factors on the prevalence of cardiovascular disease reproductive health and diabetes in rural South Africa **Corrupted** Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities He reveals the political economy at work and the intense competition for resources on campuses He also provides interventions for these fragile institutions Why do some universities seem to be in a constant state of turmoil and dysfunction Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources especially on campuses located in impoverished communities It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never ending run on the material such as money for infrastructure and symbolic namely graduation certificates for sale assets of these institutions Jansen argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly *Perspectives on Student Affairs in South Africa* McGlory Speckman, Martin Mandew, 2014-07-17 The goal of *Perspectives on Student Affairs in South Africa* is to generate interest in student affairs in South Africa The papers contained herein are based on best practice local experience and well researched international and local theories The papers in this book deal with matters pertaining to international and national trends in student affairs academic development access and retention counselling and material support for students coming from disadvantaged backgrounds They are linked to national and international developments as described in the first two papers This publication will assist both young and experienced practitioners as they grow into their task of developing the students entrusted to them All contributors are South Africans with a great deal of experience in student affairs and all are committed to the advancement of student affairs in South Africa The editors are former heads of student affairs portfolios

at two leading South African universities **Social Work in Social Change** Nicci Earle, 2008 This study forms part of a series of studies on professions and professional education being conducted by the HSRC's research programme on Education Science Skills Development It follows a pilot study on medical doctors published in 2006 entitled Doctors in a Divided Society The profession and education of medical practitioners in South Africa Like the other studies in the series this study involved developing an understanding of the professional milieu and professional labour market of social workers As the implementers of government social policy social work professionals have been at the forefront of grappling with the practicalities of the changes in focus approach and methods of social security and social service delivery since 1994 It examines developments in the education and training of social workers within the democratic dispensation the most significant of which is the development of a national standardised Bachelor of Social Work degree The study also reveals that the dominant profile in student enrolment and graduation statistics has changed from white female to African female and that enrolment has increased significantly However the study also shows that graduation trends have been negative and losses due to emigration are an additional concern Given the scarcity of these professionals against the demand for their services understanding the factors that contribute to this picture are critical to effective intervention **Shadow Libraries** Joe Karaganis, 2018-05-04 How students get the materials they need as opportunities for higher education expand but funding shrinks From the top down Shadow Libraries explores the institutions that shape the provision of educational materials from the formal sector of universities and publishers to the broadly informal ones organized by faculty copy shops student unions and students themselves It looks at the history of policy battles over access to education in the post World War II era and at the narrower versions that have played out in relation to research and textbooks from library policies to book subsidies to more recently the several open publication models that have emerged in the higher education sector From the bottom up Shadow Libraries explores how simply students get the materials they need It maps the ubiquitous practice of photocopying and what are in many cases the more marginal ones of buying books visiting libraries and downloading from unauthorized sources It looks at the informal networks that emerge in many contexts to share materials from face to face student networks to Facebook groups and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online the shadow libraries of the title If Alexandra Elbakyan's Sci Hub is the largest of these efforts to date the more characteristic part of her story is the prologue the personal struggle to participate in global scientific and educational communities and the recourse to a wide array of ad hoc strategies and networks when formal authorized means are lacking If Elbakyan's story has struck a chord it is in part because it brings this contradiction in the academic project into sharp relief universalist in principle and unequal in practice Shadow Libraries is a study of that tension in the digital era Contributors Balzs Bod Laura Czerniewicz Mirosław Filiciak Mariana Fossatti Jorge Gernetto Eve Gray Evelin Heidel Joe Karaganis Lawrence Liang Pedro Mizukami Jhessica Reia Alek Tarkowski Higher

education for public good Noluthando S. Matsiliza, 2023-03-01 This book focuses on the knowledge area of higher education governance organisational dynamics leadership and decolonisation We have observed that governance discourse has been excluded in debates that concern the public good The construct of public good seeks to support higher education that does not support a capitalist view of profit making arguably to respond to societal demands and needs such as developmental efforts through academic functions Higher Education focuses on interconnected multi disciplinary constructs intending to provide services for the public good The issue of public good is an interesting construct that puts universities on the spot since they are expected to be responsive to environmental changes and stakeholder needs through the functioning of accountable governance structures These governance structures are compelled to comply with policy demands within external and internal environmental factors This experience has exposed universities to systematic challenges that are local regional and global and which forces them to adapt while serving stakeholders and society This book will also interrogate the governance of South African public universities in the post decolonisation era and new demands from stakeholders
