## Perfect Square Chart:

*Mental Survey of Utah Schools and Adpatation of the Army Beta Tests* George Samuel Snoddy,1921      The Enigma of the Origin of Portolan Charts Roel Nicolai,2016-05-30 The sudden appearance of portolan charts realistic nautical charts of the Mediterranean and Black Sea at the end of the thirteenth century is one of the most significant occurrences in the history of cartography Using geodetic and statistical analysis techniques these charts are shown to be mosaics of partial charts that are considerably more accurate than has been assumed Their accuracy exceeds medieval mapping capabilities These sub charts show a remarkably good agreement with the Mercator map projection It is demonstrated that this map projection can only have been an intentional feature of the charts construction Through geodetic analysis the author eliminates the possibility that the charts are original products of a medieval Mediterranean nautical culture which until now they have been widely believed to be      Bulletin of the University of Utah ,1921      Math Made a Bit Easier Larry Zafran,2009-11-02 An independent book written and self published by former math teacher and private math tutor Larry Zafran Students are justified in proclaiming that math is hard but there is a specific reason why they feel this way The author maintains that the struggle can be lessened by following the roadmap presented but it will take time and effort on the part of the student Since math is often not properly taught it is often not properly learned Anything that hasn't truly been learned regardless of subject is hard Once the various concepts are more secure and the student's gaps in understanding have been addressed math will have been made a bit easier as promised by the book's title However the book does not imply that learning math is fast fun or easy Most of the book's content is comprised of the roadmap of topics for a student to work through at his/her own pace Like all paths it begins at the beginning in this case starting with a review of basic arithmetic followed by basic operations negative numbers fractions decimals percents and basic probability and statistics This is the foundation of all math The space devoted to each topic is proportional to how difficult most students find the topic as well as how important the topic is in preparation for later math studies The material is explained conversationally and in plain English as promised by the book's subtitle without talking down to the reader and without the use of contrived examples or cartoonish illustrations The book concludes with a chapter on how to effectively study math and improve scores on exams Like the rest of the book the chapter takes a unique standpoint on the matter and offers suggestions which include how to get oneself into the proper mental and emotional mindset for being successful with math      Chuckles the Rocket Dog - A Companionable Guide to Polynomials and Quadratics - Student Text and Workbook Linus Christian Rollman,Greg Logan Neps,2011-12 Volume III of a writing based common sense whimsical engaging introduction to algebra for middle grade math students      **Math Made a Bit Easier Workbook** Larry Zafran,2009-12-11 This is the second book in the Math Made a Bit Easier series by independent math tutor Larry Zafran It is a workbook of practice exercises self tests and review notes to be used in conjunction with the first book in the series subtitled Basic Math Explained in Plain English The math content in this book is directly aligned with the first book

It covers the topics which comprise the foundation of math It begins with practice in basic arithmetic followed by basic operations negative numbers fractions decimals percents and basic probability and statistics If these topics are not completely mastered later work will prove to be quite difficult This is especially true of algebra An extensive introduction describes how to obtain the greatest benefit from the book The book also outlines practical techniques for attaining the optimal mindset for studying math and improving scores on exams An answer key for all exercises and self tests is included

**CS16 Stellar Healing** C. C. Zain,2014-04-27 This book is Course 16 in the 21 Brotherhood of Light Course series by C C Zain on the Hermetic Sciences Astrology Alchemy Tarot Kabbalah and the Occult The book describes the substance and structure of the astral or stellar body The author describes how natal and progressed aspects in the chart map aeriels between various thought cell structures in the stellar body that pick up energy similar to a radio receiver And since the positions of the planets in the birth chart indicate the diseases toward which an individual may be predisposed the book lists the natal and progressed planetary configurations of 160 diseases A detailed description of how to use Astrodynes for measuring the power and harmony of planets signs and houses in both the natal and progressed chart is provided by the author who invented the concept The book teaches the student how to use Astrodynes to determine the source within the stellar or astral body that is responsible for the individual s disease or discomfort It then teaches the student various Stellar Treatments which are methods for applying appropriate healing energies to the compartment of the stellar body causing the problem
