

Periodic Table Basics

Step 1: Complete the square for each element by filling in the atomic number, name, & atomic mass.

Step 2: Determine the number of protons, neutrons, and electrons in an atom of each element.

Step 3: Identify if the element is a solid, liquid, or gas at room temperature.

Step 4: Give the melting (M.P.) and boiling points (B.P.) in degrees Celsius.

Step 5: List at least three physical or chemical properties for each element.

Step 6: List at least three uses for each element.

Step 7: Draw a Bohr diagram and Lewis Structure to show the arrangement of electrons and the number of valence electrons.

Step 8: Use the following colors to shade in the square for each element. You should **ONLY** color the small square in the upper left-hand corner and not the entire card.

Green = Li & Na
Orange = B & Al

Pink = O & S
Red = C & Si

Blue = Be & Mg
Tan = N & P

Purple = F & Cl
Yellow = He, Ne, & Ar

Step 9: Cut the cards apart and arrange according to atomic number in the pattern shown. Once you have the cards arranged in the correct order, glue them to a large sheet of construction paper.

Making Meaning by Making Connections Kathy L. Schuh, 2016-10-20 This book documents those first links that students make between content they learn in their classrooms and their prior experiences Through six late elementary school case studies these knowledge construction links are brought to life The links of the students are often rich in describing who these individuals are where they are in their learning process and what is meaningful to them Many times these links point to what has been learned both in and out of school and the contexts when and where that learning took place The mind as rhizome metaphor was used to guide the development and interpretation of the studies while the lens of Peircian semiotics provides an interpretation for these initial links The resulting grounded theory is presented through a rich and extensive presentation of excerpts from classroom observations student interviews and a student writing activity and describes the varying types of student links how the links were prompted the relationships between what the students were learning and what they already knew and specific types of in school links The narrative includes how these links were supported or inhibited in the

classroom drawing on the roles of the teachers in the classrooms and what constituted authority sources of information in those classrooms Before exploring the students linking as a process of ongoing semiosis and how this process is part of a dynamic system a study of the relationship between student knowledge links and achievement is shared This rich narrative will be of interest to scholars and practitioners alike and includes an extensive appendix documenting the research methods
