Securitization of Climate Change: Australian and United States' Military Responses (2003 - 2013) Michael Durant Thomas, 2017-07-25 This book examines how the armed forces of the United States and Australia have responded to the threat posed by climate change to national security Drawing on established securitisation frameworks Copenhagen and Paris Schools the author uses a combination of quantitative and qualitative techniques to systematically examine more than 3 500 speeches policies and doctrinal articles since 2003 Importantly the author undertakes an examination of the intersection between the political and the military spheres probing the question of how ideology has influenced the military's uptake on the issue In this context the author identifies the difficulty of an ostensibly apolitical institution responding to what has become both a hyper political issue and an unprecedented security threat A close examination of the key political actors their intent outlook and political mandate for broader climate action is therefore crucial to understanding the policy freedom and constraints within which military leaders operate The book consists of eight chapters divided into four parts focusing on perspectives and methodological insights empirical case studies case study comparison and concluding observations Offers a rare and systematic examination of military climate policy by a military officer from Australia Identifies a divergence of Australian military climate policy from that of the US military during the Obama Administration Develops a unique method that quantifies climate security enabling a graphical representation for quick and ready reference ideally suited to policy makers **Innovations in Satellite Communications and Satellite Technology** Daniel Minoli, 2015-02-27 Surveys key

Klingenberg,James Sauls,José W. F. Valle,Jan De Boer,Dumitru Baleanu,Lorenzo Pavesi,Bretislav Friedrich,Christine Charles,Matjaž Perc,Jasper Van Der Gucht,2020-05-19 Frontiers in Physics FPHY is now in its eighth year Up to last year the journal received a slowly increasing

trickle of manuscripts and then during the summer Boom The number of manuscripts we receive started increasing exponentially This is of course a signal to us who are associated with the journal that we are on the right track to build a first rate journal spanning the entire field of physics And it is not the only signal We also see it in other indicators such as the number of views and downloads Impact Factor and the Cite Score Should we be surprised at this increase If I were to describe FPHY in one word it would be innovation Attaching the names of the reviewers that have endorsed publication permanently to the published paper is certainly in this class It ensures that the reviewers are accountable furthermore the level of transparency this implies ensures that any conflict of interest is detected at the very beginning of the process The review process itself is innovative After an initial review that proceeds traditionally the reviewers and authors enter a back and forth dialog that irons out any misunderstanding The reviewers retain their anonymity throughout the process The entire review process and any question concerning editorial decisions is fully in the hands of active scientists The Frontiers staff is not allowed to make any such decision They oversee the process and make sure that the manuscript and the process leading to publication or rejection upholds the standard FPHY is of course a gold open access journal This is the only scientific publication model that is compatible with the information revolution A journal s prestige is traditionally associated with how difficult it is to publish there Exclusivity as criterion for desirability is a mechanism we know very well from the consumer market However is this criterion appropriate for scientific publishing It is almost by definition not possible to predict the importance of a new idea otherwise it would not have been new So why should journals make decisions on publishing based on predicting the possible importance of a given work This can only be properly assessed after publication Frontiers has removed importance from the list of criteria for publication That the work is new is another matter the work must be new and scientifically correct It would seem that removing the criterion of importance would be a risky one but it turns out not to be The Specialty Chief Editors who lead the 18 sections that constitute FPHY have made this selection of papers published in FPHY in 2019 We have chosen the papers that we have found most striking Even though this is far from a random selection they do give a good idea of what PFHY is about Enjoy We certainly did while making this selection Professor Alex Hansen Field Chief Editor

Helping Scientists to Communicate Well for All Considered: Strategic Science Communication in an Age of Environmental and Health Crises Scott McWilliams, Marcia Allison, Marina Joubert, Ingrid Lofgren, Brianne Suldo, 2022-09-16 Radio Science Techniques for Deep Space Exploration Sami W. Asmar, 2022-03-29 Explore the development and state of the art in deep space exploration using radio science techniques In *Radio Science Techniques for Deep Space Exploration* accomplished NASA JPL researcher and manager Sami Asmar delivers a multi disciplinary exploration of the science technology engineering mission operations and signal processing relevant to deep space radio science The book discusses basic principles before moving on to more advanced topics that include a wide variety of graphical illustrations and useful references to publications by experts in their respective fields Complete explanations of changes in the characteristics of electromagnetic waves and the instrumentation and technology used in scientific experiments are examined *Radio Science Techniques for Deep Space Exploration* offers answers to the question of how to explore the solar system with radio links and better understand the interior structures atmospheres rings and surfaces of other planets The author also includes Thorough introductions to radio science techniques and systems needed to investigate planetary atmospheres rings and surfaces Comprehensive explorations of planetary gravity and interior structures as well as relativistic and solar studies Practical discussions of instrumentation technologies and future directions in radio science techniques Perfect for students and professors of physics astronomy planetary science aerospace engineering and communications engineering *Radio Science Techniques for Deep Space Exploration* will also earn a place in the libraries of engineers and scientists in the aerospace industry **Corporate Power and Human Rights** Manette Kaisershot, Nicholas Connolly, 2018-02-02 There is ample evidence about the negative effects business activity of all types can have on the provision of human rights Equally there can be little doubt economic development usually driven through business activity

and trade is necessary for any state to provide the institutions and infrastructure necessary to secure and provide human rights for their citizens The United Nations and businesses recognise this tension and are collaborating to effect change in business behaviours through voluntary initiatives such as the Global Compact and John Ruggie s Guiding Principles Yet voluntary approaches are evidently failing to prevent human rights violations and there are few alternatives in law for affected communities to seek justice This book seeks to robustly challenge the current status quo of business approaches to human rights in order to develop meaningful alternatives in an attempt to breach the gap between the realities of business and human rights and its discourse This book was previously published as a special issue of the International Journal of Human Rights

Geoscience for the Public Good and Global Development Gregory R. Wessel, Jeffrey K. Greenberg, 2016-05-18 Offers overview of applications of geosciences to sustainable development and geophilanthropic efforts worldwide and offers advice to guide creation of development projects Primacy of geologic input to all development activities is highlighted along with problems that are encountered and environmental issues that must be addressed

Technology For Transformation Libbi R. Miller, Daniel Becker, Katherine Becker, 2016-04-01 This book serves as a platform for educators and researchers to unite educational technology and social justice While educational technology is a rapidly changing and progressive field of research and practice it remains largely separate from education for social justice Current literature about educational technology is often approached from a technical how to perspective that emphasizes ways to implement technology into the classroom Technology is often viewed as inevitable yet neutral and value free Educational technology however is anything but neutral The contributors collectively advance a hopeful discourse by exploring the potential of technology as a vehicle to transform and emancipate while not forgoing a critically reflective measure of self conscious critique of our own role as educators students or scholars in oppressive silences constraints and conditions This edited collection makes an important and unique contribution to the field as it will be the first published volume to detail research theory and practice regarding student use of technology in achieving liberatory aims since IAP s 2009 publication ICT for Education Development and Social Justice The fields of educational technology and social justice are vast and applicable in many domains including teacher education graduate programs and K 12 education This work is intended to appeal to a diverse academic and professional audience of K 12 teachers teacher educators educational technology and social justice scholars and policy makers Scholars and academics instructing graduate level educational technology courses can reference this edited collection as the most current text on socially just educational technology Educational practitioners from teacher education programs and the K 12 sector may use this book as a source of ideas and inspiration to incorporate student use of technology toward emancipatory aims This title could be adopted as a course text for both undergraduate and graduate education courses in media literacy digital literacy distance education education for social justice and teacher preparation and educational technology courses Readers will also

be able to use the book as a guide when critically analyzing their own professional practice whether it is in research working with K 12 students or preparing future educators or scholars

Opportunities in Intense Ultrafast Lasers National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Physics and Astronomy, Committee on Opportunities in the Science, Applications, and Technology of Intense Ultrafast Lasers, 2018-01-31

The laser has revolutionized many areas of science and society providing bright and versatile light sources that transform the ways we investigate science and enables trillions of dollars of commerce Now a second laser revolution is underway with pulsed petawatt class lasers 1 petawatt 1 million billion watts that deliver nearly 100 times the total world's power concentrated into a pulse that lasts less than one trillionth of a second Such light sources create unique extreme laboratory conditions that can accelerate and collide intense beams of elementary particles drive nuclear reactions heat matter to conditions found in stars or even create matter out of the empty vacuum These powerful lasers came largely from U S engineering and the science and technology opportunities they enable were discussed in several previous National Academies reports Based on these advances the principal research funding agencies in Europe and Asia began in the last decade to invest heavily in new facilities that will employ these high intensity lasers for fundamental and applied science No similar programs exist in the United States Opportunities in Intense Ultrafast Lasers assesses the opportunities and recommends a path forward for possible U S investments in this area of science

Keeping Women in Science Kate White, 2015-01-05

Keeping Women in Science examines the careers of women and men at a large Australian research institute and the challenges that women with or without children experience often resulting from direct and indirect discrimination and being positioned as outsiders The research found a huge generational change between the Baby Boomers the current science leaders and Gen X and Gen Ys Younger women and men reject the traditional model of a successful scientist a single male for whom science is like a religious vocation Instead they seek new models for doing science that support dual careers work flexibility and work life balance
