**INVESTIGATING COMPARABILITY OF WRITING TASKS WITH PICTURE PROMPTS IN AN IN-HOUSE ENGLISH PROFICIENCY TEST** YALI SHI,2022-04-28 For security reasons using parallel writing tasks within or across different test administrations is common practice in large scale language testing Lack of task comparability would result in unjustified variance in test performance and consequently jeopardize test validity and fairness Thus it is crucial for test developers to gather empirical evidence from different aspects to substantiate the fairness argument that scores are consistent and score based decisions are impartial across parallel tasks Despite many studies hitherto on writing task comparability those addressing picture prompt writing tasks in an integrated manner have remained quite underexplored Therefore this book investigates the comparability of five writing tasks with picture prompts randomly assigned across testing occasions in an in house English proficiency test EPT of a comprehensive university from three perspectives the scores the texts and the raters and test takers Results show that task difficulty is not comparable either in terms of some lexical syntactic and content features elicited or as judged by raters and test takers which could be related with topic familiarity and conceptual clarity of the picture prompt Yet overall task comparability is achieved in not only final scores but also score distribution and classification accuracy The findings support the fairness argument for EPT writing and provide theoretical practical and methodological implications
