

Missy wants to wrap a present.

She puts paper around the present.

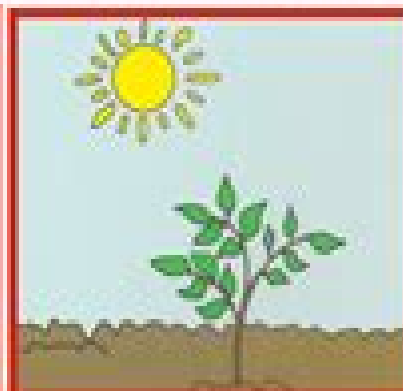

Missy ties a nice bow.

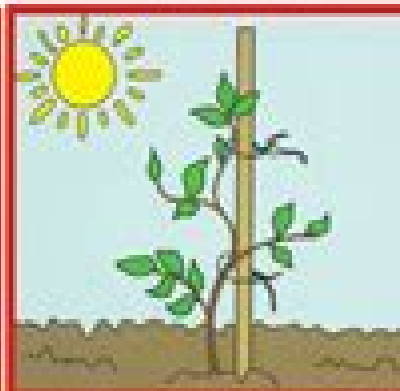

She gives the present to her mother.

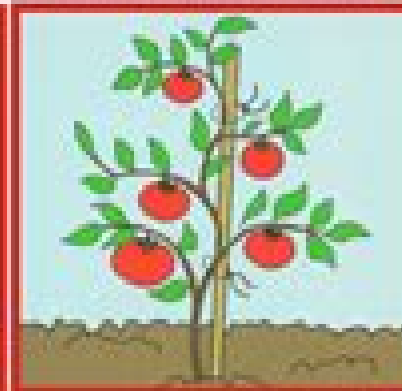

I plant a seed.

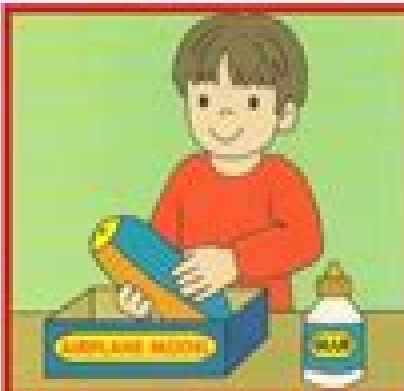

A plant starts to grow.

A stick holds the plant up.

I see tomatoes on the plant.

Sam takes parts out of the box.

First he glues on a propeller.

Second he puts on the canopy.

Last he puts on the wings.

Mindblindness Simon Baron-Cohen, 1997-01-22 In Mindblindness Simon Baron Cohen presents a model of the evolution and development of mindreading. He argues that we mindread all the time effortlessly automatically and mostly unconsciously. It is the natural way in which we interpret, predict, and participate in social behavior and communication. We ascribe mental states to people, states such as thoughts, desires, knowledge, and intentions. Building on many years of research, Baron Cohen concludes that children with autism suffer from mindblindness as a result of a selective impairment in mindreading. For these children, the world is essentially devoid of mental things. Baron Cohen develops a theory that draws on data from comparative psychology, from developmental and from neuropsychology. He argues that specific neurocognitive mechanisms have evolved that allow us to mindread, to make sense of actions, to interpret gazes as meaningful, and to decode the language of the eyes.
