

RSP 1098

7.1 Surround Preamp/Processor

Description

On the RSP-1098's front panel, you'll find an integral LCD color monitor flanked by just a power switch, two levels, and six miniature pushbuttons. These elements let even technophobes enjoy the RSP-1098's exceptional performance, yet allow more sophisticated users a level of control, system customization, and convenience.

The RSP-1098 contains a power supply built around Rotel-made dual toroidal transformers and special low-ESR storage capacitors for a rock-solid source of operating current and superb isolation between digital and analog sections. The RSP-1098 uses modular construction borrowed from the computer industry which provides performance free of the crosstalk and noise inevitable with more crowded designs.
