Lean Construction 4.0 Vicente A. González, Farook Hamzeh, Luis Fernando Alarcón, 2022-12-30 This book introduces and develops the novel concept of Lean Construction 4.0 The capability of Lean Construction to effectively adapt the architecture engineering construction AEC industry to this new era of digital transformation requires a reconceptualization of the triad people processes technology as a foundation for the theoretical and practical framework of Lean Construction Therefore a shift towards Lean Construction 4.0 is required Lean Construction 4.0 is a new systems wide thinking approach where synergies and overlaps between Lean Construction and digital smart technologies go far beyond BIM to reshape the way we design manage and operate capital projects in the modern age of automation This pioneering new book brings together the views of world experts at the interface of Lean Construction and digital smart technologies in order to channel research efforts to introduce and discuss

current research and practice challenges and drivers and future perspectives of Lean Construction 4.0. It is not the aim of the book to keep adding digits to the term Lean Construction to catch up with the industry revolutions as they go on. Instead, after reading this book, it will be undeniable for readers that the triad process-people-technology as proposed by Lean Construction 4.0 is required to achieve an effective long-lasting digital transformation of the AEC industry. Thus, the aim of Lean Construction 4.0 is better explained by what it evokes: a future vision of construction systems comprising people, processes, and technology using Industry 4.0/5.0 as a basis for technological innovation in the AEC industry coupled with Lean Construction theory and practice as a jettison for improved processes and systems integration. The Lean Construction 4.0 concept coined and developed in this edited book is unique, and the chapters provide practitioners and academics with a provocative reflection on the theoretical and practical aspects that shape the Lean Construction 4.0 concept. More importantly, Lean Construction 4.0 proposes a rationale for the AEC industry not only to survive but to thrive.

Classroom-based Assessment in L2 Contexts Dina Tsagari, 2016-06-22. This edited volume addresses issues that promote the notion of Classroom-based Language Assessment (CBLA) for the academic community and beyond. The book explores recent thinking and research on CBLA within the fields of language testing, assessment, and general education based on theoretical and research papers presented at the recent CBLA SIG EALTA Symposia held in Cyprus and the pre-conference EALTA workshops in various countries around Europe. The volume contains 17 chapters which involve both high-stakes tests and classroom-based assessments conducted by academics, professionals, and researchers in the field. It brings together high-quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention. Overall, this edited collection with its international scope offers a ground-breaking resource bringing together in a balanced relationship the fields of education and second language testing and assessment.

International Public Procurement Khi V. Thai, 2016-07-30. Using a comparative framework, this volume presents case studies of issues of public procurement and discusses how procurement professionals and policy makers in different regions are responding to these challenges. This book discusses current issues in public procurement. Over the past few decades, public procurement has had to evolve conceptually and organizationally in the face of unrelenting budget constraints, government downsizing, public demand for increased transparency in public procurement, as well as greater concerns about efficiency, fairness, and equity. Procurement professionals have also had to deal with a changeable climate produced by emerging technology, environmental concerns, and ongoing tension between complex regional trade agreements and national socioeconomic goals. The first section discusses innovation and reforms in public procurement and how practitioners are adapting to and making use of new technologies. The second section addresses the challenges of maintaining transparency, equity, and fairness in public procurement. The final section discusses preferential public procurement and introduces strategies for building sustainable public procurement systems. By combining theory and analysis with evidence from the real world, this book is of equal use to academics, policy
