Suddenly nothing can be taken for granted visiting ailing relatives shopping or going to church. The internet and particularly social networking sites have become the indispensable infrastructure holding our sociability together. The global companies of the digital economy profited handsomely. How about the users of their services? This volume explores how priests inhabit the digital environment of social networking sites specifically Facebook. The authors looked at how they present themselves what they publish and how people engage with this content. The context of the pandemic suggested that we should also examine how digital technology and social media are being used for purposes of priestly ministry. Our hope is that these analyses and considerations will help not just priests but every person at becoming proficient not only in things virtual but also in practicing virtue. Media in the Digital Age John Vernon Pavlik, 2008 Digital technologies have fundamentally altered the nature and function of media in our society. This book critically examines digital innovations and their positive and negative implications. **PC Mag**, 1987-10-13 PCMag.com is a leading authority on technology delivering Labs based independent reviews of the latest products and services.
