Semantics in Mobile Sensing Zhixian Yan,Dipanjana Chakraborty,2022-06-01 The dramatic progress of smartphone technologies has ushered in a new era of mobile sensing where traditional wearable on body sensors are being rapidly superseded by various embedded sensors in our smartphones For example a typical smartphone today has at the very least a GPS WiFi Bluetooth triaxial accelerometer and gyroscope Alongside new accessories are emerging such as proximity magnetometer barometer temperature and pressure sensors Even the default microphone can act as an acoustic sensor to track noise exposure for example These sensors act as a lens to understand the user s context along different dimensions Data can be passively collected from these sensors without interrupting the user As a result this new era of mobile sensing has fueled significant interest in understanding what can be extracted from such sensor data both instantaneously as well as

considering volumes of time series from these sensors For example GPS logs can be used to determine automatically the significant places associated to a user s life e g home office shopping areas The logs may also reveal travel patterns and how a user moves from one place to another e g driving or using public transport These may be used to proactively inform the user about delays relevant promotions from shops in his regular route Similarly accelerometer logs can be used to measure a user s average walking speed compute step counts gait identification and estimate calories burnt per day The key objective is to provide better services to end users The objective of this book is to inform the reader of the methodologies and techniques for extracting meaningful information called semantics from sensors on our smartphones These techniques form the cornerstone of several application areas utilizing smartphone sensor data We discuss technical challenges and algorithmic solutions for modeling and mining knowledge from smartphone resident sensor data streams This book devotes two chapters to dive deep into a set of highly available commoditized sensors the positioning sensor GPS and motion sensor accelerometer Furthermore this book has a chapter devoted to energy efficient computation of semantics as battery life is a major concern on user experience
