**The Integration and Protection of Immigrants** Paul Van Aerschot,Patricia Daenzer,2016-02-24 In Scandinavian countries immigration is a sensitive issue and legislators approach to the questions it has raised has varied over the years Whatever immigrant and integration policies are adopted in a democratic society it is clear that the legislation and the authorities have to ensure that the individual rights of the immigrants residing in its territory are respected With Canada as a point of reference this book draws attention to weaknesses in the regulation and implementation of integration provisions threatening the immigrants individual rights in the EU member states of Denmark Finland and Sweden The study challenges readers to critically review the meaning of rights and the notion of global caring It takes a critical look at how vulnerable immigrants fare in a largely immigrant nation with a welfare capitalism legacy when compared to three European nations which claim to embrace institutional welfare models This book will be of great interest to scholars and decision makers interested in Scandinavian or Canadian immigration and integration policies

Branch Line Empires Michael Bezilla,Luther Gette,2017-11-06 The saga of a fierce business rivalry Absorbing well written will appeal to American history scholars and railroad enthusiasts Choice The Pennsylvania and the New York Central railroads helped to develop central Pennsylvania as the largest source of bituminous coal for the nation By the late nineteenth century the two lines were among America s largest businesses and would soon become legendary archrivals The PRR first arrived in the 1860s Within a few years it was sourcing as much as four million tons of coal annually from Centre County and the Moshannon Valley and would continue do so for a quarter century The New York Central through its Beech Creek Railroad affiliate invaded the region in the 1880s first seeking a dependable long term source of coal to fuel its locomotives but soon aggressively attempting to break its rival s lock on transporting the area s immense wealth of mineral and forest products Beginning around 1900 the two companies transitioned from an era of growth and competition to a time when each tacitly recognized the other s domain and sought to achieve maximum operating efficiencies by adopting new technology such as air brakes automatic couplers all steel cars and diesel locomotives Over the next few decades each line began to face common problems in the form of competition from other forms of transportation and government

regulation and in 1968 the two businesses merged Branch Line Empires offers a thorough and captivating analysis of how a changing world turned competition into cooperation between two railroad industry titans Includes photographs

**the Long Twentieth Century** Marie Cronqvist,Fredrik Mohammadi Norén,Emil Stjernholm,2024-08-08 Integrating media studies with history Media Tactics in the Long Twentieth Century explores the dynamic relationship between tactics and strategies in recent history Drawing on examples from a range of different countries and world regions and looking at the infrastructures entanglements and institutions involved the volume makes a strong case for media tactics as a new field of scholarly inquiry and for the importance of a historically informed approach In contrast to strategic communication approaches this media historical intervention contributes to new knowledge about the practical implementation of strategies First foregrounding tactics as an object of study the volume then counters the presentism of contemporary studies by adding a necessary historical perspective Moreover the book theoretically disentangles the concept of strategy from an abstract contemporary buzzword to concrete hands on actions which in turn reveals the complexity of using media strategies and media tactics in reality This volume will interest scholars and students working in the field of media and communication in general and in the subfields of strategic communication public relations media history and propaganda studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Decarbonization in the European Union** Sebastian Oberthür,2015-06-25 The authors examine how far internal policies in the European Union move towards the objective of reducing greenhouse gas emissions in the EU by 80 95 per cent by 2050 and how or whether the EU s 2050 objective to

decarbonise could affect the EU's relations with a number of external energy partners      The Paradox of Openness  
,2014-11-13 The open society has become a watchword of liberal democracy and the market system in the modern globalized world. Openness stands for individual opportunity and collective reason as well as bottom up empowerment and top down transparency. It has become a cherished value despite its vagueness and the connotation of vulnerability that surrounds it. Scandinavia has long considered itself a model of openness citing traditions of freedom of information and inclusive policy making. This collection of essays traces the conceptual origins, development and diverse challenges of openness in the Nordic countries and Austria. It examines some of the many paradoxes that openness encounters and the tensions it arouses when it addresses such divergent ends as democratic deliberation and market transactions, freedom of speech and sensitive information, compliant decision making and political and administrative transparency and consensual procedures and the toleration of dissent.
