Attributes of 2D Shapes

I spy a shape that has/a:

Answer

3 sides, angles, and corners	triangle
4 sides and angles that are all equal	square
8 sides, angles, and corners	octagon
0 sides, angles, and corners	circle
a quadrilateral with only one pair of parallel sides	trapezoid
a quadrilateral with 4 equal sides and only opposite angles equal	rhombus
5 sides, angles, and corners	pentagon
a quadrilateral with only opposite sides equal to each other, all angles =	rectangle
6 sides, angles, and corners	hexagon

Attributes of 3D Shapes

I spy a shape that has:

Answer

2 curved surface, 2 faces, 0 vertices	cylinder
12 edges, 8 vertices, 6 square faces	cube
2 curved surface, 0 faces, 0 vertices	sphere
8 edges, 5 vertices, 5 faces	pyramid
2 curved surface, 1 face, 1 vertex	cone
12 edges, 8 vertices, 6 rectangular faces	rectangular prism

Learning and Performance Assessment: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2019-10-11 As teaching strategies continue to change and evolve and technology use in classrooms continues to increase it is imperative that their impact on student learning is monitored and assessed New practices are being developed to enhance students participation especially in their own assessment be it through peer review reflective assessment the introduction of new technologies or other novel solutions Educators must remain up to date on the latest methods of evaluation and performance measurement techniques to ensure that their students excel Learning and Performance Assessment Concepts Methodologies Tools and Applications is a vital reference source that examines emerging perspectives on the theoretical and practical aspects of learning and performance based assessment techniques and applications within educational settings Highlighting a range of topics such as learning outcomes assessment design and peer assessment this multi volume book is ideally designed for educators administrative officials principals deans instructional designers school boards academicians researchers and education students seeking coverage on an educator s role in evaluation design and analyses of evaluation methods and outcomes **Implementing Performance Assessment** Michael B. Kane, Ruth Mitchell, 2013-11-05 As the commitment to performance assessments as a strategy of reform has increased across the nation so has the controversy surrounding the purposes development implementation and effects of alternative forms of assessment One of the first of its kind this edited volume provides an incisive and comprehensive account of the issues pertaining to performance assessments The 10 papers comprising the volume were originally written to establish a conceptual framework for a three year U S Department of Education Office of Educational Research and Improvement sponsored national study of performance assessments Written by leading experts in the field the papers explicate the central issues regarding the development implementation and utility of performance assessments The topics covered by the papers include a discussion of contemporary as well as historical events in the performance assessment movement technical characteristics of performance assessments including reliability validity generalizability and calibration conceptualization and calculation of the costs of performance assessments the implications of performance assessments on students who have traditionally done less well in American schools including racial and linguistic minorities the fit between performance assessments and organizational change in education and the utilization of performance assessment as an instrument of state policy Readers will find the policy and technical issues covered in this volume to be useful from a variety of academic research and policy perspectives including conceptualizing and implementing performance assessments Geometry: An Integrated Approach McDougal Littell Incorporated, 1998 *Performance Assessment* Brian McLean Semple, 1992 The second International Assessment of Educational Progress focused on the mathematics and science achievement of 13 year olds Performance assessments were used as part of the overall assessment in four countries England

Scotland Soviet Union and Taiwan and five Canadian provinces The performance assessment approach drew heavily on the experience of the United Kingdom in such assessments but added features to meet the needs of an international study The performance tasks required students to apply concepts observe measure manipulate equipment and materials and record and interpret data Approximately 3 000 students participated in the 1991 mathematics and science assessments Scores varied widely from task to task and from country to country Relative performance of countries and provinces generally differed from those identified by written curriculum based tests A major lesson learned from the experimental test administration is that this form of performance assessment can be used reliably in international comparative studies although at an estimated cost three to four times greater than that for an equivalent number of written test questions Sample mathematics and science tasks are included and there is an appendix on problem solving in mathematics that describes outcomes produced by Scottish students SLD

Structural Sensing, Health Monitoring, and Performance Evaluation D. Huston, 2010-09-21 Structural health monitoring SHM uses one or more in situ sensing systems placed in or around a structure providing real time evaluation of its performance and ultimately preventing structural failure Although most commonly used in civil engineering such as in roads bridges and dams SHM is now finding applications in other engineering environments

Assessing Deeper Learning Douglas G. Wren, 2019-08-01 Deeper learning has been defined as the skills and knowledge that students must possess to succeed in 21st century jobs and civic life William and Flora Hewlett Foundation 2013

Assessing Deeper Learning Developing Implementing and Scoring Performance Tasks examines the role of performance assessment to facilitate student attainment of the core competencies of deeper learning The book details a journey that a large school district undertook to create a system of performance tasks designed to assess students proficiency in critical thinking problem solving and effective communication Chapters devoted to the development and implementation of the district's high quality performance tasks and rubrics highlight successes and lessons learned during the journey Additional chapters focus on such topics as types of performance assessments instructional methods that promote student engagement and deeper learning policy and how teacher leaders can drive this innovation to serve the teaching learning assessment and accountability needs of schools

Assessing Deeper Learning Developing Implementing and Scoring Performance Tasks was written for teachers administrators superintendents and policy makers to better understand the challenges and opportunities afforded by using performance assessment to promote deeper learning

Performance Assessment Measure That Indicates Geometry Sufficiency of State Highways Andrew Tarko, Avedibya Dey, Mario Romero, 2015-09-01 The Indiana Department of Transportation INDOT selects projects for implementation by taking into account several criteria related to cross section alignment and safety to evaluate various geometry improvements to be carried out as a part of projects The existing practice uses an intuitive point allocation method to score these individual categories The current study proposes a methodology to evaluate these projects considering the

safety and mobility impacts of the improvements which lie in the scope of each project This methodology is also used to screen roads based on existing geometry deficiencies with respect to a desirable design standard The road screening process and the project evaluation process form two steps that support the asset management process The road screening process helps in filtering road segments based on geometry deficiencies and identifies the least adequate road segments Projects may be further developed with estimated improvements to be carried out on such segments using detailed information regarding these improvements The asset management components discussed here rely on the evaluation of safety and mobility benefits corresponding to geometry changes To develop an up to date method the safety performance functions used in this method have been calibrated based on the latest crash data available for 2009 2011 Safety performance functions have been developed for rural two lane rural multi lane urban two lane and urban multi lane roads in the state of Indiana The crash modification factors derived from these safety performance functions and speed adjustments from earlier studies supplemented with data available in Highway Capacity Manual are used to calculate the safety and mobility benefits

New Approaches to Assessment in Science and Mathematics ,1997 Mathematics 2003 and 2005: performance in Puerto Rico. highlights ,2007 **Performance Standards: High school** New Standards (Organization),1997 *Assessment of Authentic Performance in School Mathematics* Richard A. Lesh,Susan J. Lamon,2013-04-03 This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin s National Center for Research in Mathematical Sciences Education The purpose of the conference was to facilitate the work of a group of scholars whose interests included the assessment of higher order understandings and processes in foundation level pre high school mathematics Discussions focused on such issues as the purposes of assessment guidelines for producing and scoring real life assessment activities and the meanings of such terms as deeper and higher order understanding cognitive objectives and authentic mathematical activities Assessment was viewed as a critical component of complex dynamic and continually adapting educational systems During the time that the chapters in this book were being written sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology cognitive psychology and mathematics as well as to numerous public demands for educational reform These changes have already resulted in significant reappraisals of what it means to understand mathematics of the nature of mathematics teaching and learning and of the real life situations in which mathematics is useful The challenge was to pursue assessment related initiatives that are systematically valid in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms To address these issues most chapters in this book focus on clarifying and articulating the goals of assessment and instruction and they stress the content of assessment above its mode of delivery Computer or portfolio based assessments are interpreted as means to ends not as ends in themselves Assessment is conceived as an ongoing documentation process seamless with instruction whose quality hinges upon its

ability to provide complete and appropriate information as needed to inform priorities in instructional decision making This book tackles some of the most complicated issues related to assessment and it offers fresh perspectives from leaders in the field with the hope that the ultimate consumer in the instruction assessment enterprise the individual student will reclaim his or her potential for self directed mathematics learning *Performance-Based Learning* Sally Berman,2008 Provides excellent thorough examples of lessons for classroom use The lessons follow a user friendly pattern and include outstanding rubrics that can be adapted easily by the teacher Debra Rose Howell TeacherMonte Cristo Elementary Granite Falls WA Gives educators new to performance learning a broad collection of examples for using this model The sample lessons are tied to learning standards and incorporate a myriad of different modalities Rachel Moreno Associate Professional SpecialistUniversity of Notre Dame Motivate students and increase their achievement with high interest learning tasks Teachers can promote long lasting learning build higher order thinking skills develop individual student accountability and increase student achievement by incorporating performance learning tasks into the curriculum In this second edition of *Performance Based Learning* Sally Berman demonstrates how this model can be modified for learners at different grade and ability levels and offers an abundance of sample lesson plans that show how to use performance based learning throughout the content areas The updated edition includes an expanded discussion of cooperative learning teams a new section on how to design effective performance based learning activities and a collection of reproducible masters for planning and implementation Chapters with lesson plans include A performance task to use as is or adapt for specific student groups The curriculum standards related to the task Reflection guidelines to help students evaluate their learning Web resources for planning and implementing performance learning tasks New and veteran teachers alike will use this detailed resource again and again to plan activities that engage students and inspire them to become invested in their own learning Prediction And Performance In Rock Mechanics and Rock Engineering Giovanni Barla,2022-05-04 A collection of conference proceedings on rock mechanics and rock engineering covering such topics as foundations of dams bridges and large structures mining structures formulation of geotechnical models rock mass characterization and recent advances in modelling **Online Assessment and Measurement** Scott L. Howell,Mary Hricko,2006-01-01 This book features case studies detailing online applications and uses of assessment and measurement methodologies systems and practices across three broad educational or training areas Provided by publisher **The Performance of Concentrated Solar Power (CSP) Systems** Peter Heller,2017-05-15 The Performance of Concentrated Solar Power CSP Systems Analysis Measurement and Assessment offers a unique overview of the information on the state of the art of analysis measurement and assessment of the performance of concentrated solar power CSP components and systems in a comprehensive compact and complete manner Following an introductory chapter to CSP systems and the fundamental principles of performance assessment individual chapters explore the component performance of mirrors and receivers Further expert written chapters look at

system performance assessment durability testing and solar resource forecasting for CSP systems A final chapter gives an outlook on the actual methods and instruments for performance and durability assessment that are underdevelopment The Performance of Concentrated Solar Power CSP Systems Analysis Measurement and Assessment is an essential reference text for research and development professionals and engineers working on concentrated solar power systems as well as for postgraduate students studying CSP Presents a unique single literature source for a complete overview of the performance assessment tools and methods currently used for concentrated solar power CSP technology Written by a team of experts in the field of CSP Provides information on the state of the art of modeling measurement and assessment of the performance of CSP components and systems in a comprehensive compact and complete manner *Mathematics 2005 performance in Puerto Rico, focus on the content areas* , *Designing Assessment for Mathematics* Eileen Depka,2007-05-31 Clearly demonstrates how to design rubrics for math a content area that desperately needs support The use of rubrics combined with performance tasks helps educators teach math at a higher more engaging level A must have book for all educators seeking to build a strong thinking based math program Lee Ann Cervini Principal Holley Elementary School NY Makes a distinct contribution to the field Not only does the text clearly explain how to create rubrics and performance tasks in a step by step manner each chapter also provides an example for immediate use in the classroom Marcia Carlson Sixth Grade Teacher Crestview Elementary School Clive IA Enhance students understanding of math concepts through rubrics and hands on learning Teaching mathematics in today s world requires practices and procedures integrated with performance tasks that actively involve students In this second edition of Designing Rubrics for Mathematics Eileen Depka clarifies the purpose of rubrics in math instruction and illustrates the relationship between assessment rubrics and the National Council of Teachers of Mathematics Principles and Standards for School Mathematics 2000 Each chapter in this research based updated edition offers easy to use strategies suggestions creative sample problems and tasks to engage students in hands on learning while allowing them to have fun in the process With two new chapters focused on communication to deepen students understanding of math concepts and using rubric data to improve instruction this resource provides teachers with Reflective activities to use with students for metacognitive processing Strategies for creating standards linked rubrics plus samples Tips for differentiating performance tasks How to s for student created rubrics Internet resource links for rubric development mathematical focal points and standards Designing Assessment for Mathematics Second Edition demonstrates how to drive instruction and successfully boost achievement levels by providing students with experiences that impact their learning and performance **11th International Conference on Turbochargers and Turbocharging** IMechE,2014-08-25 The future market forces and environmental considerations in the passenger car and commercial vehicle sector mean more stringent engine downsizing is far more prevalent Therefore novel systems are required to provide boosting solutions including hybrid electric motor and exhaust waste energy recovery systems for high efficiency response

reliability durability and compactness The current emission legislations and environmental trends for reducing CO₂ and fuel consumption are the major market forces in the land and marine transport industries The internal combustion engine is the key product and downsizing efficiency and economy are the driving forces for development for both spark ignition SI and compression ignition CI engines in both markets Future market forces and environmental considerations for transportation specifically in the passenger car commercial vehicle and the marine sectors mean more stringent engine downsizing This international conference is the latest in the highly successful and prestigious series held regularly since 1978 These proceedings from the Institution s highly successful and prestigious series address current and novel aspects of turbocharging systems design boosting solutions for engine downsizing and improvements in efficiency and present the latest research and development in this growing and innovative area Focuses on boosting solutions including hybrid electric motor and exhaust waste energy recovery systems Explores the current need for high efficiency reliability durability and compactness in recovery systems Examines what new systems developments are underway
