Periodontal Medicine and Systems Biology Brian Henderson, Michael Curtis, Robert Seymour, Nikolaos Donos, 2009-07-07
This book provides a systems based approach to periodontology and offers a scientific roadmap of the interactions which can lead to periodontal disease. The content is divided into five sections. The first introduces the reader to the concept of systems theory and its mathematical foundation. The second section provides the reader with a current view of periodontal medicine including the microbiology molecular genetics relationship to systemic disease and current and future therapies. Periodontitis is caused by members of the oral microbiota and the third section provides the reader with various views of the relationship of the microbiota to the host. The fourth section moves from the bacterium to the host and its immune responses to altered host bacteria interactions. The final section deals specifically with bone destruction in periodontitis and brings the reader up to date with the current view of the control network that exists between mesenchymal cells such as osteoblasts immune cells and osteoclast precursor cells that controls bone remodelling in health and disease. **Newman and Carranza's Clinical**

Use of Saliva in Diagnosis of Periodontitis: Cumulative Use of Bacterial and Host-Derived Biomarkers Ulvi Kahraman Gürsoy, Eija Könönen, 2017-03-15 Periodontitis is an infection induced inflammatory disease of the tooth supporting tissues. Treatment of periodontal diseases and regeneration of the effected tissues can be possible only in the early diagnosis of the disease. If left undiagnosed or untreated periodontitis leads to irreversible soft and hard tissue destruction and finally to tooth loss. Saliva is known to contain inflammatory mediators host tissue and cell degradation products as well as microbial metabolites and enzymes reflecting the health status of the oral cavity. In this topic in collaboration with the well known scientists working on the field of salivary diagnostics we demonstrate evidence on monitoring periodontitis by salivary analysis.
