Synthesizes the latest information on the assessment of microbial presence and microbial activity in natural and artificial environments Features a section on biotransformation and biodegradation Serves as an indispensable reference for environmental microbiologists microbial ecologists and environmental engineers as well as those interested in human diseases water and wastewater treatment and biotechnology Functional Genomics Stephen P. Hunt, Frederick Livesey, 2000 With the complete genomes of many organisms now available and the first draft of the human genome imminent there is an increasing demand from researchers in a range of disciplines for techniques that will allow them to utilize these resources in their own research This book provides a comprehensive treatment of the range of methods available for gene and protein expression profiling in a variety of systems These include large scale methods such as cDNA microarrays serial analysis of gene expression SAGE and proteomics and also methods suitable for non specialist laboratories such as differential display and suppression subtraction hybridization In all cases the chapters have been written by the developers of these methods or experienced users and include detailed protocols to facilitate the introduction of these methods to the readers laboratories *Genome Analysis*, 1997 A complement to the bible of recombinant DNA Molecular Cloning these manuals are essential for every laboratory in which genes are being studied **Molecular Characterization of Neutralization Determinants and Phylogenetic Analysis of Open Reading Frame 5 (ORF5) of Equine Arteritis Virus** Udeni Ralalage Balasuriya, 1996 **PCR in Situ Hybridization** Gerard J. Nuovo, 1997 Describes the technique whereby the extreme sensitivity of the polymerase chain reaction PCR is combined with the cell localizing ability of in situ hybridization This revised and updated edition contains chapters on the basics of molecular biology the nonspecific pathways of PCR applications of PCR in situ hybridization human papillomavirus and HIV 1 and instrumentation There is also an appendix on reagents for molecular biological analyses Annotation copyright by Book News Inc Portland OR *Frequency, Distribution and Sequence Divergence of Rice Microsatellites* Xiuli Chen (Plant geneticist), 1999 *Anticancer Research*, 2009 *Journal of Forensic Sciences*, 1996 Includes papers read at the Academy's annual meeting previously published separately as Proceedings of the American Academy of Forensic Sciences **Russian Journal of Bioorganic Chemistry**, 1997 **Botany**, 2009 **Simultaneous Sulfate Reduction and Metal Precipitation in an Inverse Fluidized Bed Reactor** Denys Kristalia Villa Gomez, 2022-01-26 Industrial activities like textile processing and mining are typical sources of heavy metal rich wastewaters The sulfate reducing process has become an attractive method for the production of sulfide to precipitate metals since most of these streams also contain sulfate which is the electron acceptor and in less common cases

chemical oxygen demand which is the electron donor of sulfate reducing bacteria The inverse fluidized bed IFB reactor is a system for the production of biogenic sulfide and metal precipitation in the same unit due to its configuration the biomass floats on top of the reactor whereas metal sulfide precipitates settle and thus can be recovered at the bottom The main objective of this thesis was to elucidate the factors affecting simultaneous sulfate reduction and precipitation of heavy metals in an IFB reactor in order to optimize the metal recovery from wastewaters such as acid mine drainage Therefore this thesis focused on varying different operational conditions to study their effect on the solid liquid separation and purity of the metal sulfide precipitates as well as on their effect on the sulfate reducing process Furthermore one chapter was focused on the study of strategies for sulfide control in the IFB reactor In addition recommendations for further research to improve the recovery of the metal sulfides in bioreactors are given
