Technical Note - National Advisory Committee for Aeronautics United States. National Advisory Committee for Aeronautics, Technical Memorandum Waterways Experiment Station (U.S.), 1968. The National Union Catalog, 1968-1972, 1973. Next Target - Earth! Johnny W. Underwood, 2025-05-19. In Next Target Earth, an alien civilization, multiple thousands of years in advanced technology, has interfered with life on Earth even before the demise of the dinosaurs. Their meddling resulted in the creation of atomic weapons during WWII. Earth is now in the middle of the twentieth century, and the alien civilization has determined that humanity is advancing in technology too fast and will again eliminate all life on Earth as they did when the dinosaurs became a bore to them. Fortunately for Earth, the aliens are fighting a war with a sister civilization in their own galaxy, so the Earth is a secondary target for now. This alien civilization is a mirror image of humans. Their inability to understand that peaceful cooperation is preferable to aggressively eliminating life forms that are not part of their civilization reflects the divisions found on Earth throughout the existence of humans on our planet. Constant wars and lack of empathy for others has needlessly deprived humanity of hundreds of thousands of resources that could have been used for the betterment of the human race instead of the wanton destruction those wars have wrought. The book ends with the burning question: Is there anyone or something else out there? About the Author: Johnny W. Underwood is a career soldier, joining the US Army at age seventeen immediately after graduating from high school in Arkansas. He survived basic combat training at Fort Polk, Louisiana, in the summer of 1968 and completed advanced individual training as an engineer heavy equipment operator at Fort Leonard Wood, Missouri. After AIT, he was assigned to a field artillery unit in Germany and was promoted into the ranks of the cannoneers. He served in Germany for a cumulative total of eleven years and at Fort Sill, Oklahoma, the home of the field artillery, for a total of thirteen years, six and a half of those years were as a drill sergeant. Other assignments include a tour in Vietnam in 1969-70, two years in South Korea, and three years at Fort Lewis, Washington. He completed the US Army Sergeants Major Course at Fort Bliss, Texas, in 1986 as a member of Class 27 and was the command sergeant major of three battalions, two brigades, and a Corps Artillery for the last twelve years of his

thirty year Army career After retiring from the Army he was a Zone Manager for GEICO s local office program for five years and a manager in the GEICO Military Department for fourteen years He retired from GEICO in 2017 He lives in Northern Virginia with his wife of more than thirty six years *Monthly Catalog of United States Government Publications* United States. Superintendent of Documents,1993 Improving How Universities Teach Science Carl Wieman,2017-05-22 Too many universities remain wedded to outmoded ways of teaching Too few departments ask whether what happens in their lecture halls is effective at helping students to learn and how they can encourage their faculty to teach better But real change is possible and Carl Wieman shows us how it can be done through detailed tested strategies **Effect of Aging Aircraft Structures on Magnesium Parts** A. W. Winston,1945 The forms in which magnesium alloys may be encountered are castings extrusions forgings and sheet The alloys commonly used in aircraft structures in the various forms and the effects of the aging treatment are discussed under separate headings below
