Dear Becky Williams,

This letter of opinion constitutes my professional opinion on the act of flying a radio-controlled drone.

Regardless of the size or purpose of flying a radio-controlled drone, under the law it is designated as an Unmanned Aerial Vehicle or Drone, meaning it is subject to all the same regulations as any other aircraft – manned, unmanned, private, or commercial. This falls under the Federal Aviation Regulations, Title 76, and is explored in Advisory Circular 11-22.

What this means is that if your model airplane reaches 350 feet or above you may be charged with a number of offenses related to hazardous flying. Likewise, if you should wish to fly the drone along federally designated airways, you must get prior clearance from your local Air Traffic Control, and maintain real-time correspondence with them. In actuality, you are unlikely to be granted permission.

I advise that if you wish to fly your plane recreationally you do so at altitudes below 500 feet and well away from airports or military bases.

Sincerely,

Dillian White, Attorney at Law
