

An APA Research Paper Model

Thomas Delancy and Adam Solberg wrote the following research paper for a psychology class. As you review their paper, read the side notes and examine the following:

- The use and documentation of their numerous sources.
- The background they provide before getting into their own study results.
- The scientific language used when reporting their results.

Center the title one inch from the top. Double-space throughout.

The introduction states the topic and the main questions to be explored.

The researchers supply background information by discussing past research on the topic.

Extensive referencing establishes support for the discussion.

Running on Empty: The Effects of Food Deprivation on Concentration and Perseverance

Many things interrupt people's ability to focus on a task: distractions, headaches, noisy environments, and even psychological disorders. To some extent, people can control the environmental factors that make it difficult to focus. However, what about internal factors, such as an empty stomach? Can people increase their ability to focus simply by eating regularly?

One theory that prompted research on how food intake affects the average person was the glucostatic theory. Several researchers in the 1940s and 1950s suggested that the brain regulates food intake in order to maintain a blood-glucose set point. The idea was that people become hungry when their blood-glucose levels drop significantly below their set point and that they become satisfied after eating, when their blood-glucose levels return to that set point. This theory seemed logical because glucose is the brain's primary fuel (Pindl, 2000). The earliest investigation of the general effects of food deprivation found that long-term food deprivation (36 hours and longer) was associated with sluggishness, depression, irritability, reduced heart rate, and inability to concentrate (Keys, Brozek, Henschel, Mickelsen, & Taylor, 1950). Another study found that fasting for several days produced muscular weakness, irritability, and apathy or depression (Kollar, Slater, Palmer, Docter, & Mandell, 1964). Since that time, research has focused mainly on how nutrition affects cognition. However, as Green, Elliman, and Rogers (1995) point out, the effects of food deprivation on cognition have received comparatively less attention in recent years.

The ESL Writer's Handbook, 2nd Ed. Janine Carlock, Maeve Eberhardt, Jaime Horst, Lionel Menasche, 2017-12-20 The ESL Writer's Handbook is a reference work for ESL students who are taking college level courses Because its purpose is to provide help with the broad variety of writing questions students may have when working on school assignments the text focuses on English for Academic Purposes Unlike other handbooks on the market this book's sole purpose is to address the issues of second language learners The spiral bound Handbook complements a student writer's dictionary thesaurus and grammar reference book It would be suitable as a text for an advanced ESL writing course when used together with the companion Workbook 978 0 472 03726 1 The new edition features significant revisions to Sections 3 and 4 in particular both APA and MLA style guides have been updated and new sample papers for each are included The new edition includes new and revised exercises and many new samples of student writing Like its predecessor the 2nd Edition has these special features The topic selection is based on ESL writers needs as observed by the authors over many years The coverage of

topics is more complete than the limited amount usually provided for ESL writers in first language or L1 handbooks. The explanatory language is appropriate for ESL students in contrast to the more complex and idiomatic language of other English handbooks. Many of the examples of paragraphs, essays, research papers, and exercise sentences were written by ESL students to help users realize that they too can become effective writers. *The Little, Brown Guide to Writing Research Papers* Michael Meyer, 1985.
