Ten Assessment Literacy Goals for School Leaders Stephen Chappuis, Steve Chappuis, Susan M. Brookhart, Jan Chappuis, 2021-04-21 Of all school related factors that influence student learning only classroom instruction has greater impact than leadership And leaders have the greatest impact when they set direction citing that the goals and purpose they provide serves to strengthen and solidify the faculty The ten competencies for school leaders described in this book are based on a few factors First standards driven reform has created new knowledge requirements and responsibilities for school leaders In today s systems sorting students along a bell curve and artificially creating winners and losers has been replaced by a mission that all students must learn well Instead of a curriculum focused on what a teacher should teach the curriculum identifies what students must know and be able to do These standards are public and communicate what a state or district values when it comes to student learning Assessing the standards day to day not through large scale accountability tests or even local short cycle or common assessments is a requirement for effective standards based reform Second is the reward of
