Reproductive Tract Microbiome - Gatekeeper for Sexual and Reproductive Health Mariya Ivanova Petrova, Jo-Ann S. Passmore, Lindi Masson, 2023-03-21 An optimal female reproductive tract FRT microbiome represents a cornerstone for successful reproductive and sexual health Although understanding the link between the microbiota and our health is the focus of a growing number of research programs and research has advanced in the last decade the FRT microbiome remains relatively poorly defined This is despite it being one of the most critical factors impacting fertility and the health of the future generation Important gaps in our knowledge remain about women specific microbial niches such as the lower FRT The vaginal microbiome of healthy women is almost exclusively dominated by *Lactobacillus* species making these species

synonymous with vaginal health. Largely thanks to their capacity to produce high levels of lactic acid, lactobacilli are thought to inhibit most invading bacterial and viral pathogens. Nonetheless, the dogma that all *Lactobacillus* species are key beneficial species in the vaginal niche has been questioned based on the association with disease for some of the major players in the niche, for example *L. iners*, particularly in non-European or Caucasian cohorts. Further, the ability of other mostly anaerobic species besides lactobacilli to maintain similar homeostasis in the vaginal niche raises the question of what we define as optimal or healthy vaginal microbiota. Answering this question is essential since a non-optimal or dysbiotic vaginal microbiome has been linked to the acquisition of sexually transmitted infections (STIs), infertility, and adverse pregnancy outcomes. To confront these healthcare challenges, we should be able to distinguish between an optimal and non-optimal microbiome. With the advance of sequence-based technologies as well as other omics methodologies including metaproteomics, metabolomics, and culturomics, we are now able to begin to correlate the presence as well as the activities of specific organisms and microbial communities with health or disease. However, we are only beginning to understand the complexity of interactions between bacterial community members with each other and the human host. A better understanding of these relationships within this specialized environmental niche and in relation to female sexual and reproductive health is critical for the development of novel diagnostics and therapeutics to create and maintain an optimal FRT microbiome.

Political Activism across the Life Course Sevasti-Melissa Nolas, Christos Varvantakis, Vinnarasan Aruldoss, 2019-12-18 How do people of different ages experience and engage with politics in their everyday lives, and how do these experiences and engagements change over their life course and across different generations? Age, life course, and generation have become increasingly important experiences for understanding political participation and political outcomes, and current policies of austerity across the world are affecting people of all ages. This book contributes towards an interdisciplinary understanding of the temporalities of everyday political encounters. At a time when social science is struggling to understand the rapid and unexpected changes to contemporary political landscapes, the contributors to this book present examples of activism and politics across everyday experiences of homes, communities, online platforms, local environment, playgrounds, and educational spaces. The research takes ethnographic, biographical, and action research approaches, and the studies described feature interlocutors as young as four and as old as ninety-two who reside in European, North, and South America, and South Asia. This is an eclectic text that brings together a number of themes and ideas not typically associated with political activism and is intended for students and academic researchers across the humanities, social, and political sciences interested in the temporalities of everyday political participation. This book was originally published as a special issue of *Contemporary Social Science*.

Epistemic Freedom in Africa Sabelo Ndlovu-Gatsheni, 2018-06-27 *Epistemic Freedom in Africa* is about the struggle for African people to think, theorize, interpret the world, and write from where they are located, unencumbered by Eurocentrism. The imperial denial of common humanity to

some human beings meant that in turn their knowledges and experiences lost their value their epistemic virtue Now in the twenty first century descendants of enslaved displaced colonized and racialized peoples have entered academies across the world proclaiming loudly that they are human beings their lives matter and they were born into valid and legitimate knowledge systems that are capable of helping humanity to transcend the current epistemic and systemic crises Together they are engaging in diverse struggles for cognitive justice fighting against the epistemic line which haunts the twenty first century The renowned historian and decolonial theorist Sabelo J Ndlovu Gatsheni offers a penetrating and well argued case for centering Africa as a legitimate historical unit of analysis and epistemic site from which to interpret the world whilst simultaneously making an equally strong argument for globalizing knowledge from Africa so as to attain ecologies of knowledges This is a dual process of both deprovincializing Africa and in turn provincializing Europe The book highlights how the mental universe of Africa was invaded and colonized the long standing struggles for an African university and the trajectories of contemporary decolonial movements such as Rhodes Must Fall and Fees Must Fall in South Africa This landmark work underscores the fact that only once the problem of epistemic freedom has been addressed can Africa achieve political cultural economic and other freedoms This groundbreaking new book is accessible to students and scholars across Education History Philosophy Ethics African Studies Development Studies Politics International Relations Sociology Postcolonial Studies and the emerging field of Decolonial Studies The Open Access versions Chapter 1 and Chapter 9 available at <https://doi.org/10.4324/9780429492204> have been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Modern Motherhood and Women's Dual Identities Petra Bueskens, 2018-05-31 Why do women in contemporary western societies experience contradiction between their autonomous and maternal selves What are the origins of this contradiction and the associated double shift that result in widespread calls to either lean in or opt out How are some mothers subverting these contradictions and finding meaningful ways of reconciling their autonomous and maternal selves In *Modern Motherhood and Women's Dual Identities* Petra Bueskens argues that western modernisation consigned women to the home and released them from it in historically unprecedented yet interconnected ways Her ground

breaking formulation is that western women are free as individuals and constrained as mothers with the twist that it is the former that produces the latter Bueskens theoretical contribution consists of the identification and analysis of modern women's duality drawing on political philosophy feminist theory and sociology tracking the changing nature of discourses of women freedom and motherhood across three centuries While the current literature points to the pervasiveness of contradiction and double shifts for mothers very little attention has been paid to how some women are subverting contradiction and rewriting the sexual contract Bridging this gap Bueskens interviews ten revolving mothers to reveal how periodic absence exceeding the standard work day disrupts the default position assigned to mothers in the home and in turn disrupts the gendered dynamics of household work A provocative and original work *Modern Motherhood and Women's Dual Identities* will appeal to graduate students and researchers interested in fields such as Women and Gender Studies Sociology of Motherhood and Social and Political Theory [The Routledge Handbook of Language and the Global South/s](#) Sinfree Makoni, Anna Kaiper-Marquez, Lorato Mokwena, 2022-08-25 This Handbook centers on language's in the Global South's and the many ways in which both language and the Global South are conceptualized theorized practiced and reshaped Drawing on 31 chapters situated in diverse geographical contexts and four additional interviews with leading scholars this text showcases Issues of decolonization Promotion of Southern epistemologies and theories of the Global South's A focus on social applied linguistics An added focus on the academy A nuanced understanding of global language scholarship It is written for emerging and established scholars across the globe as it positions Southern epistemologies language scholarship and decolonial theories into scholarship surrounding multiple themes and global perspectives [Home is where Your Politics are](#) Jessica A.
