Parametric Framework for Modelling of Bioelectrical Signals Yar M. Mughal,2016-01-05 This book examines non invasive electrical based methods for disease diagnosis and assessment of heart function In particular a formalized signal model is proposed since this offers several advantages over methods that rely on measured data alone By using a formalized representation the parameters of the signal model can be easily manipulated and or modified thus providing mechanisms that allow researchers to reproduce and control such signals In addition having such a formalized signal model makes it possible to develop computer tools that can be used for manipulating and understanding how signal changes result from various heart conditions as well as for generating input signals for experimenting with and evaluating the performance of e g signal extraction methods The work focuses on bioelectrical information particularly electrical bio impedance EBI Once the EBI has been measured the corresponding signals have to be modelled for analysis This requires a structured approach in order to move from real measured data to the model of the corresponding signals This book proposes a generic framework for this procedure It can be used as a guide for modelling impedance cardiography ICG and impedance respirography IRG signals as well as for developing the corresponding bio impedance signal simulator BISS Handbook of Universities and Regional

Development Attila Varga,Katalin Erdős,2019-12-27 The Handbook on Universities and Regional Development offers a comprehensive and up to date insight into how academic institutions spur their surroundings The volume sheds light on universities as regional development actors from a historical perspective by introducing institutional changes and discussing the interrelatedness of society business and academia It provides detailed investigations on various knowledge transfer mechanisms to help understand the diverse ways through which ideas and intellectual property can flow between universities and businesses Detailed case studies from three continents Europe Asia and America demonstrate the highly contextual nature of the interactions between academia industry and government **For Bumpier Times** Lakshmy

Glial Plasticity in Depression João F. Oliveira,Catarina A. Gomes,Sandra H. Vaz,Nuno Sousa,Luisa Pinto,2016-10-24 Major depression is a highly prevalent disorder that poses a significant social burden in society nowadays The pathophysiology of this disease is still poorly understood but growing evidence suggests that impaired neuron and glial plasticity may be a key underlying mechanism for the precipitation of the disorder One of the most surprising findings in this field was the involvement of glial cells in the pathophysiology of major depression and in the action of antidepressants namely in mechanisms related with adult neurogenesis imbalances or dendritic arborization impairments In particular several works refer to alterations in the morphology and numbers of astrocytes microglia and oligodendrocytes in the context of depression in human patients or animal models of depression These observations were linked to functional evidences and suggested to underlie the pathophysiology of depression Among others these include impairments in the cross talk between glia and neurons changes in the level of neurotransmitter or immunoactive substances myelination status synapse formation maintenance or elimination In addition to the implication of glia in the pathophysiology of depression a number of studies is ascribing glia pathways to classically accepted antidepressant mechanisms Therefore it is noteworthy to elucidate the role of glia in the effect provided by antidepressant treatment in order to better understand secondary effects and elucidate alternative targets for treatment

The Troubled Rhetoric and Communication of Climate Change Philip Eubanks,2015-05-15 Despite an overwhelming scientific consensus climate change remains one of the most controversial issues of our time Focusing on the rhetoric that surrounds the issue of climate change this groundbreaking book analyses why the debate continues to rage and

examines how we should argue when winning the argument really matters Going beyond routine condemnations of the wildest statements made by religious fundamentalists or spokespeople for fossil fuel interests the book explains the mutually exacerbating problems that permit many of us greet catastrophic predictions with an equivocal shrug It argues that the argumentative situation around climate change makes a certain kind of skepticism fair minded skepticism not only possible but likely The book also strikes a hopeful note reminding us that people do change their minds in response to effective argumentation that appeals to deeply shared values Offering new insight into an ongoing academic discussion about the nature of argument and how it can be undertaken more effectively and ethically as well as a new perspective on the rhetoric of science and technology this book will be a valuable resource to students and scholars of climate change environmental humanities rhetoric environmental communication sociology and science and technology studies **Carbohydrate**
