Doyle Stevick, 2015-03-16 This volume represents the most comprehensive collection ever produced of empirical research on Holocaust education around the world It comes at a critical time as the world observes the 70th anniversary of the liberation of Auschwitz We are now at a turning point as the generations that witnessed and survived the Shoah are slowly passing on Governments are charged with ensuring that this defining event of the 20th century takes its rightful place in the schooling and the historical consciousness of their peoples The policies and practices of Holocaust education around the world are as diverse as the countries that grapple with its history and its meaning Educators around the globe struggle to reconcile national histories and memories with the international realities of the Holocaust and its implications for the present These efforts take place at a time when scholarship about the Holocaust itself has made great strides In this book these issues are framed by some of the leading voices in the field including Elie Wiesel and Yehuda Bauer and then explored by many distinguished scholars who represent a wide range of expertise Holocaust education is of such significance so rich in meaning so powerful in content and so diverse in practice that the need for extensive high quality empirical research is critical This book provides exactly that

Social Studies Education in South and South East Asian Contexts Kerry J Kennedy, 2021-07-22 The education of young people is context bound This edited volume explores the contexts that characterise South and South East Asia and their influence on social studies education There is not a single context across this broad geographical expanse rather

different religions different political systems and different values exert influences that create distinctive programmes that characterise different countries Yet there are also commonalities such as the post colonial nature of most of the countries portrayed in this book determined efforts at establishing new national communities and multiple value systems that lead to distinctive local priorities There are also voices of resistance in these chapters recognising the realities of local contexts but also recognising the need for change Social studies education in these contexts may well be descended from its origins in North America but in South and South Asian contexts it has taken on new purposes new forms and new values Education researchers policymakers and postgraduate students in comparative education will find the volume useful in its exploration and comparison of the social studies curricular and reforms that shaped them Upgrade Your Curriculum Janet A.

Using curricula for subjects such as history citizenship education and languages and structures like the existence of state funded separate or common schools Fontana shows that power sharing constrains the scope for specific education reforms and offers some suggestions for effective ones to aid political stability and reconciliation after civil wars **Teacher**
